1.1 Regardless of whether or not you have heard of ‘biodiversity’, what would you say it is or means? (Q2)

The variety of life or similar

<i>A large variety of living things in one area.</i>
<i>A range of all things biological.</i>
<i>About making sure all species survive. no single one dominating so evolution can take its normal course.</i>
<i>Abundance of plants and species in that locality</i>
<i>All living things.</i>
<i>All the different types of animals.</i>
<i>All things that are living and the variety of them.</i>
<i>Animals plus Flora plus Fauna.</i>
<i>Balance of species animals to keep the environment going.</i>
<i>Bigger range of animal and plant life.</i>
<i>Bio is to do with animal or vegetable. The diversity is different species.</i>
<i>Biological, various species</i>
<i>Bio-range. Different species, the way they live. Their life support systems.</i>
<i>Changing farming practices to encourage wildlife.</i>
<i>Differences in biological systems.</i>
<i>Differences in plants in different areas of the world.</i>
<i>Different ecosystems and environments within one area.</i>
<i>Different needs of different living things.</i>
<i>Different species and environment.</i>
<i>Different species in area, diverse biology.</i>
<i>Different species living in one environment.</i>
<i>Different species living in the same environment.</i>
<i>Diverse - difference of species and developments.</i>
<i>Diverse biological forms.</i>
<i>Diverse nature.</i>
<i>Diverse range of life of plants and animals.</i>
<i>Diverseness of animals and plants.</i>
<i>Diversity of all things biological.</i>
<i>Diversity of life on earth.</i>
<i>Diversity of life.</i>
<i>Diversity of species of Flora and Fauna in a particular way.</i>
<i>Diversity of species.</i>
<i>Diversity of species.</i>
<i>Diversity of the biological environment, to do with animals.</i>
<i>Diversity of wildlife, animals and plants in the habitat.</i>
<i>Diversity of wildlife.</i>
<i>Division of degradation/ the planet.</i>
<i>Encouraging wildlife and wild places.</i>

<i>Having a number of large number of different species in the large area. For example I have a large variety of Bio-diversity in my garden.</i>
<i>Having lots of different species of animals and vegetation.</i>
<i>Having various plants and animals around.</i>
<i>How diverse the animals are.</i>
<i>How diverse the population is within the environment, species.</i>
<i>How many different species you have in a certain area (animals & plants).</i>
<i>I understand it to mean creatures in an area and small animals and plants - all things living.</i>
<i>Is it the loss of plants and animals?</i>
<i>It relates to the different types of living things.</i>
<i>It the Flora and Fauna of the earth.</i>
<i>It's a diversity of species and environment.</i>
<i>It's a range of animal and plant life.</i>
<i>It's all about different types of living things.</i>
<i>Its diverse biology.</i>
<i>Its the flora and fauna in that area.</i>
<i>It's the variety of plants and animals and the natural environment.</i>
<i>Keep the amount of species that we have at a healthy level.</i>
<i>Keeping a certain range of species, a broad range of wildlife.</i>
<i>Keeping flora and fauna alive.</i>
<i>Living things and the difference between them.</i>
<i>Lots of different species living in the same place.</i>
<i>Lots of diverse plants and organisms.</i>
<i>Maintaining a balance of natural species as much as possible.</i>
<i>Means biology, plants and animals and their different environments.</i>
<i>Means just the variety of species of any particular habitat</i>
<i>Means total numbers of organic species.</i>
<i>Number and types of (flora and fauna) the local area.</i>
<i>One word for the large number of plants, animals and insects living on the planet.</i>
<i>Range of animals and plant life.</i>
<i>Range of biological species and sub-species existent, generally in reference on earth.</i>
<i>Range of different species around plants and wildlife.</i>
<i>Range of species in a certain area.</i>
<i>Refer to an environment that supports a variety of plants and animals, all wildlife and insects and pond life and nature generally.</i>
<i>Something to do with diversity of animal species and things.</i>
<i>Spread of species</i>
<i>Sustaining lots of different eco-systems and the species within them.</i>
<i>The amount of different species that there are in our environment including plants.</i>
<i>The amount of different varieties of species.</i>
<i>The different plants and animals.</i>
<i>The environment. Range of life forms and what it can support.</i>
<i>The number of different species in a given area of birds.</i>
<i>The range of species and how they live and relate to the world around us.</i>
<i>The spread of types of animals or life forms.</i>
<i>The variety of plants and animals</i>
<i>The way the planet is made with lots of diverse plants and animals.</i>
<i>To do with developing the environment in such a way to encourage variety of life.</i>

<i>Totality of animal and plant life in a habitat.</i>
<i>Variable numbers of biological ecological systems.</i>
<i>Variation of species on the planet.</i>
<i>Variations in different types of animals and plant life.</i>
<i>Varied plants and living things.</i>
<i>Variety of flora and fauna.</i>
<i>Variety of things around, more than one.</i>
<i>Variety of things living.</i>
<i>Whole system. Pyramid, with plants at the bottom, gets high and higher for advanced species at the top of the ecosystem.</i>

Relating to biology, biological, livings things, related sciences

<i>All living things</i>
<i>All living things</i>
<i>All the living things</i>
<i>Anything to do with the body, people, animals and organisms.</i>
<i>Bio has biology to do with the body. Diversity can be different ways.</i>
<i>Bio sounds medical.</i>
<i>Bio... biological</i>
<i>Biological - not sure what diversity means.</i>
<i>Biological in some way.</i>
<i>Biological something.</i>
<i>Genetic modifications.</i>
<i>Interaction of different micro-biology species.</i>
<i>It must be something about biological stuff - what you eat?</i>
<i>Life</i>
<i>Life</i>
<i>Living things</i>
<i>Living things.</i>
<i>Not sure, something biological.</i>
<i>Plants and living things</i>
<i>Respect for all living things.</i>
<i>Something about living things</i>
<i>Something biological.</i>
<i>Something biological. Could mean half.</i>
<i>Something biological. Not alien to the situation. We live in a good area. (Hard to read).</i>
<i>Something to do with biology.</i>
<i>Something to do with life.</i>
<i>Sounds like... bio is the body... diversity is life.</i>
<i>The living animals on the planet.</i>
<i>The selection of plants and life forms in different forms.</i>
<i>To do with species.</i>

Diversity meaning change, difference

<i>Adaptable.</i>
<i>Change</i>
<i>Changing things</i>
<i>Changing things from one thing to another.</i>
<i>Differences... bio might be healthy differences.</i>
<i>Different things, different types.</i>
<i>Different ways of doing things but I can't think what.</i>
<i>Diverse is being different, taking a different path.</i>
<i>Divert something, one source to another</i>
<i>Don't know, but think it's world changes.</i>
<i>It's diversity away from the way we live now.</i>
<i>Just changing diverting from one thing to something better.</i>
<i>Other things, or other ways.</i>
<i>Something to do with change.</i>
<i>Splitting things and diversifying.</i>
<i>Trying to change ways of thinking.</i>

Relating to chemicals, chemistry, medicine

<i>Being able to more around a few chemical things.</i>
<i>Bio - which one is it? It is chemical?</i>
<i>Bio-chemicals</i>
<i>Breakdown of chemicals.</i>
<i>Change in medicines and the way they are made.</i>
<i>Chemical alternatives1</i>
<i>Chemical products.</i>
<i>Chemical side of what we are living in and what we are doing to make it this way.</i>
<i>Chemical term - don't know</i>
<i>Chemicals</i>
<i>Chemicals</i>
<i>Chemicals</i>
<i>Chemicals - bio is chemicals.</i>
<i>Chemicals, I think using them instead of using something else.</i>
<i>It is to do with chemicals.</i>
<i>It's to do with green issues and chemicals.</i>
<i>Not a clue. Possibly chemicals.</i>
<i>Not using chemicals.</i>
<i>Something chemically.</i>
<i>Something to do with chemicals</i>
<i>Sounds like chemistry.</i>
<i>To do with chemicals and pollution.</i>
<i>Using of alternative chemicals.</i>

Environmental issues, e.g. global warming, pollution, resources

<i>(Something) diverse in environmental issues.</i>
<i>A change from consumables to natural products.</i>
<i>A change in the structure of the planet, in the gases etc.</i>
<i>A greener alternative to what we are using at the moment.</i>
<i>About developing your lifestyle to be greener.</i>
<i>All to do with climate changing and the natural resources of that area.</i>
<i>An alternative way of growing food without pesticides.</i>
<i>Basically having to use scientific research into various ways of living and helping the environment.</i>
<i>Being able to use ecological resources in a different way.</i>
<i>Caring for the environment.</i>
<i>Changing aspects of society, to be more responsible for the environment.</i>
<i>Changing attitudes towards green policies.</i>
<i>Changing something so that it doesn't do any damage.</i>
<i>Changing things for greener ways.</i>
<i>Different alternatives to whatever we are using, carbon emissions etc.</i>
<i>Different kinds of environment, and what not</i>
<i>Different levels of environmental awareness.</i>
<i>Different range of options friendly to the earth.</i>
<i>Different things to help the environment.</i>
<i>Different things within the environment</i>
<i>Different ways and different views on the environment and how to put it right.</i>
<i>Different ways of doing things and producing things that will not harm the environment.</i>
<i>Different ways of protecting or saving the environment.</i>
<i>Different ways of using things that doesn't harm the environment.</i>
<i>Different ways of using things to help the environment.</i>
<i>Different ways you can conserve or damage the environment and what health issues you can raise depending on how we manage our lives.</i>
<i>Diverse ways of being environmentally friendly.</i>
<i>Diversifying in an environmental friendly way.</i>
<i>Diversifying into things which are better for the planet.</i>
<i>Diversion in the environment.</i>
<i>Don't do something soon, there will be nothing left.</i>
<i>Don't Know is it an environment issue.</i>
<i>Emissions.</i>
<i>Environment</i>
<i>Environment</i>
<i>Environment</i>
<i>Environmentally friendly</i>
<i>Everybody looking at issues, of what it is. General consensus.</i>
<i>Good towards the environment which has more than one use.</i>
<i>Green issues and global warming.</i>
<i>Green issues.</i>
<i>Interaction between humans and resources.</i>
<i>is it to do with segregating different issues of the environment?</i>
<i>It doesn't have an impact on the environment.</i>
<i>It's how we look after the environment - plants and animals.</i>

<i>Keeping the environment healthy.</i>
<i>Looking at alternative methods or resources.</i>
<i>Makes a difference, environment wise.</i>
<i>Other methods of doing things in an environmentally manner.</i>
<i>Plants</i>
<i>Reference to using other products to sustain what we use now.</i>
<i>Saving the planet.</i>
<i>Something to do with global warming.</i>
<i>Something to do with green issues.</i>
<i>Something to do with the earth like global warming problems.</i>
<i>Something to do with the environment</i>
<i>Something to do with the environment but I'm not sure what.</i>
<i>Something to do with the environment.</i>
<i>The diversity in between the environment, good and bad.</i>
<i>The environment issues/saving plants and wild birds.</i>
<i>The government, wildlife, animals and plants in the environment - everything that lives.</i>
<i>The products you use and their effect on the environment.</i>
<i>The way that people use the environment and corrupt it.</i>
<i>Things in environment</i>
<i>To do with global warming - I think it has something to do with green issues/rainforest.</i>
<i>To do with products, right things or not.</i>
<i>Using a range of products.</i>
<i>Using different stuff instead of what we use today.</i>
<i>Using more natural products that help the environment</i>
<i>Using more than one solution or source of goods.</i>
<i>Using stuff that can be bio-degradable.</i>
<i>Using the land to grow things and stop using other resources.</i>
<i>Using the resources you have the best.</i>
<i>Well diversifying what we are using in solving the planet for alternatives.</i>
<i>When you are making the most of the environment and make better use of it.</i>
<i>You avoid doing things to damage the world</i>

Fuel/energy sources, e.g. alternative energy

<i>Alternative fuels.</i>
<i>Alternative fuels.</i>
<i>Alternative fuels.</i>
<i>Alternative types of fuel.</i>
<i>Burning of new home grown fuels.</i>
<i>Changes to bio-fuel.</i>
<i>Changing fuel to alternative methods.</i>
<i>Different fuels.</i>
<i>Diversifying energy.</i>
<i>Diversifying what you are using - gas, fossil fuels.</i>
<i>Diversity of energy sources.</i>
<i>Diverting natural energy into live energy.</i>
<i>Doing the opposite to save energy.</i>

<i>Fuel from different sources</i>
<i>Fuels, what they use to make fuel canisters from.</i>
<i>Growing of bio-fuels.</i>
<i>I'm assuming it's bio fuels and the way we can use them</i>
<i>Instead of using fossil use crops.</i>
<i>It is to do with energy sources.</i>
<i>It means developing fossil fuels and using it instead of petrol.</i>
<i>It's to do with fuels and stuff. Biodegradable stuff, nature looking after itself</i>
<i>It's to do with structure of new, "green" buildings i.e. solar heating.</i>
<i>Making fuel from trees and plants.</i>
<i>Making sure we keep an eco balance. Using different sorts of fuels to generate heat. One thing sustaining another.</i>
<i>Products from animals converted into energy.</i>
<i>Stop using some things, cut down on gas and electricity use.</i>
<i>Sustainable Fuels, alternative ways around fossil fuel use.</i>
<i>Taking energy sources from sustainable areas; something to do with the environment.</i>
<i>The fact that you can find alternative sources of fuel</i>
<i>To do with energy.</i>
<i>To do with getting energy from different sources.</i>
<i>To do with the fuels</i>
<i>Using Bio-fuels and crops instead of petrol to save materials.</i>
<i>Using different things other than fossil fuels - anything that causes CO2 emissions, harms the atmosphere.</i>
<i>Using electricity instead of gas or other forms of fuel.</i>
<i>Using other things rather than petrol.</i>
<i>Various things, wind and sea power.</i>

The environment: natural and farmland

<i>A choice between different ways of growing things.</i>
<i>Alternative change so you can grow different plants in different climates.</i>
<i>Animal life and plants, protection of them.</i>
<i>Animals and many things like that.</i>
<i>Basically trees and vegetation.</i>
<i>Biological/wildlife</i>
<i>Biosphere equals trees.</i>
<i>Combination of crops.</i>
<i>Difference in the environment to plants, wildlife, birds and pond life.</i>
<i>Green things and saving plants or birds. Don't know really.</i>
<i>Have heard of it, something to do with wildlife.</i>
<i>It is to do with plants.</i>
<i>It's about encouraging plants to grow.</i>
<i>Natural habitats</i>
<i>Natural wildlife preserved.</i>
<i>Nature, species, trees, interaction, sustainable.</i>
<i>Open spaces</i>
<i>Plant and animal rescue.</i>

<i>Plants</i>
<i>To grow a mixture of crops.</i>
<i>Trees</i>
<i>Trees.</i>
<i>Where creatures actually evolve and get used to their environment.</i>
<i>Wild birds or wildlife</i>
<i>Wildlife land development of wildlife.</i>

Recycling/biodegradability/waste

<i>Being able to use things again like recycling.</i>
<i>Biodegradable</i>
<i>Biodegradable is recycling so biodiversity is trying to put that into other aspects of your life.</i>
<i>Biodegradable products.</i>
<i>Biodegradable, composting.</i>
<i>Biodegradable.</i>
<i>Biodegradable.</i>
<i>Bio-degradable. Everyone should do it.</i>
<i>Biodegrading garden compost etc.</i>
<i>Biodegrading material.</i>
<i>Biodegrading thing.</i>
<i>Biodegrading.</i>
<i>Break down of waste products.</i>
<i>breaking down into elements like plastic bags and rubbish.</i>
<i>Breaking down of material.</i>
<i>Breaking up of products.</i>
<i>Changing of biodegradable substances.</i>
<i>Collect all the plastics.</i>
<i>Different term for something I already know about. Power/fuel for cars, with the biodegradable option.</i>
<i>Diverse ways of getting rid of rubbish.</i>
<i>Green peace or something, biodegradable things.</i>
<i>I imagine that it means about bio-degradable things.</i>
<i>Is it to do with biodegradable things?</i>
<i>Is it universal biodegrading, I don't know a green thing.</i>
<i>It means breaking down by biodegradability.</i>
<i>Like all your trash getting recycled.</i>
<i>Like biodegradable I would imagine, can be put into the ground and will disappear.</i>
<i>Like composting; biodegradable things.</i>
<i>Looking at making things biodegradable packaging.</i>
<i>No idea - could be environment or biodegrading</i>
<i>Probably to do with biodegradable things.</i>
<i>Recycling or something.</i>
<i>Recycling, that doesn't hurt the environment.</i>
<i>Recycling.</i>
<i>Recycling.</i>
<i>Recycling.</i>

<i>Rotten vegetation compose.</i>
<i>Something about biodegradable.</i>
<i>Something that can be recycled.</i>
<i>Something that doesn't add to the waste on the planet.</i>
<i>Something to do with biodegradable packaging.</i>
<i>Something to do with biological or biodegradable products.</i>
<i>Something to do with things breaking down naturally</i>
<i>Something to do with waste.</i>
<i>Sorting out your rubbish.</i>
<i>Sounds like bio, so break down of stuff.</i>
<i>The changing of the way we recycle.</i>
<i>The disposal of household waste in a safe way.</i>
<i>Things that can be used again.</i>
<i>Things you use. Recycling instead of just putting things in the bin.</i>
<i>To do with bio degradable goods.</i>
<i>To do with recycling.</i>
<i>Universal biodegrading is it?</i>
<i>Using all the biodegradable stuff.</i>
<i>Using biodegradable things and being more environmentally friendly.</i>
<i>Using biodegradable things.</i>
<i>Using resources that we dispose of instead of disposing of them.4</i>
<i>Waste.</i>
<i>Waste.</i>
<i>You buy stuff that you know can be recycled.</i>
<i>You can use something and reuse it again.</i>

Other

<i>"2" of something.</i>
<i>About the body.</i>
<i>Awareness of how things are going and what we should do about it.</i>
<i>'Bio' is two. 'Diversity' is other ways of doing things.</i>
<i>Bio, don't know, trying to avoid something.</i>
<i>Different types of agriculture.</i>
<i>Don't know might be a county thing.</i>
<i>I can't express its several components.</i>
<i>I farm so we use biodegrade a lot in order to sustain foods.</i>
<i>Is it something to do with racial harmony? Everyone living together?</i>
<i>It's like arable farming moving to beef farming then moving to other things.</i>
<i>Keeping all sorts of things in the same area.</i>
<i>Making sure that everything is progress.</i>
<i>Mixture of things.</i>
<i>Protection of something.</i>
<i>Something about the world.</i>
<i>Something to do with biopsies - blood - medical anyway.</i>
<i>Sounds like disintegrated bio-grade potted flowers.</i>
<i>Tides and moon and planting of crops.</i>

<i>To do with cleaning the countryside.</i>
<i>To do with toiletries.</i>
<i>To go off, in different directions in business.</i>
<i>Two of something.</i>
<i>Various ways of farming etc.</i>
<i>What you are using for your houses, the biological stuff that we use.</i>
<i>Where you make something.</i>

1.2 Can you give any examples, you are aware of, where biodiversity in the North East has increased or is increasing? (Q5)

Increased numbers of/new plant & animal species

<i>Animals have increased.</i>
<i>Barn Owls and Corncrakes around.</i>
<i>Bats and birds have increased.</i>
<i>Bird species.</i>
<i>Birds</i>
<i>Birds - Kite</i>
<i>Birds in the North of Scotland.</i>
<i>Birds of prey</i>
<i>Birds of prey, fish because cleaner rivers and more butterflies.</i>
<i>Birds, eagles.</i>
<i>Cats and dogs</i>
<i>Certain types of birds (doesn't know which ones)</i>
<i>Climate change has encouraged some birds to come here</i>
<i>Cows onto the hillside. Increases the wild flowers.</i>
<i>Crops like Rape and Luxeed are being grown again.</i>
<i>Deer have increased</i>
<i>Different species of plants and more plants in woodlands.</i>
<i>Don't know just a lot more birds about.</i>
<i>Dragonflies</i>
<i>Fish ponds, hedgerows.</i>
<i>Fish/ell found in waterways in the North East of England which have not been seen for years.</i>
<i>Found beavers in the North East and Scotland</i>
<i>Foxes and Magpies.</i>
<i>Foxes use to live in farm lands but are now coming into town.</i>
<i>Grey Squirrel.</i>
<i>Grey squirrels and minks</i>
<i>Grey Squirrels, birds - pigeons</i>
<i>Grey squirrels, more foxes, people and pigeons.</i>
<i>Grey squirrels.</i>

<i>Grey squirrels.</i>
<i>Hedges</i>
<i>House Pets.</i>
<i>I am sure there are places near here where there has been an increase in plants, birds and animals.</i>
<i>I think more unusual animals and sea life are finding their way here</i>
<i>Increases in fish, butterflies and insects.</i>
<i>Kites at Rolands Gill</i>
<i>Local field behind us is now a flower meadow, wildlife has increased because of not cutting back wild flowers and more awareness of not interfering with nature.</i>
<i>Magpies increasing, foxes about.</i>
<i>More fish in the river due to cleaner water.</i>
<i>More foreign insects.</i>
<i>More grey squirrels now than there use to be.</i>
<i>More insects, bigger spiders</i>
<i>More rats and pigeons because of mild winters.</i>
<i>More squirrels around where I live</i>
<i>More wildlife where I live</i>
<i>Nettles are now more common in the countryside - good for insects and butterflies.</i>
<i>Northumbria - red squirrels</i>
<i>Not sure but some species are on the increase, not sure what.</i>
<i>Oil seed rape</i>
<i>On the news about birds</i>
<i>Only slugs and snails thousand fold caused by the decrease of garden birds.</i>
<i>Organic agriculture</i>
<i>Otters</i>
<i>Otters</i>
<i>Otters, birds of prey in Northumberland</i>
<i>Otters. Durham. Brown butterfly, red kites, snails and slugs.</i>
<i>Pigeons and Robins are more frequent visitors to my garden.</i>
<i>Planting more woods</i>
<i>Planting trees in the North East</i>
<i>Pond life is producing more frogs and insects.</i>
<i>Preserving wild flowers/areas of animal life and ponds being harmed.</i>
<i>Rats</i>
<i>Rats - near river.</i>
<i>Rats and mice</i>
<i>Rats.</i>
<i>Red and grey squirrels</i>
<i>Red kite, Peregrine Falcons recently, UK wide, Kittewakes.</i>
<i>Red kite.</i>
<i>Red Kites</i>
<i>Red Kites</i>
<i>Red Kites and certain animals and plants have increased, the list is too long, only because another species has increased.</i>
<i>Red kites and red squirrels have returned to the Worth east.</i>
<i>Red Kites, some shrubs and trees.</i>
<i>Red kites.</i>
<i>Red kites.</i>

<i>Red Kites.</i>
<i>Red Kites.</i>
<i>Red kites.</i>
<i>Red kites.</i>
<i>Red Kites.</i>
<i>Red Kites.</i>
<i>Red kites.</i>
<i>Red squirrel</i>
<i>Red squirrels</i>
<i>Red squirrels</i>
<i>Red Squirrels are increasing and so are Swallows.</i>
<i>Rodents, rats and mice are more common then they use to be.</i>
<i>Salmon, otters, lilies and plants.</i>
<i>Sea life, places are encouraging plant life</i>
<i>Sea-gulls</i>
<i>Some birds... was it in Hamsterley Forest?</i>
<i>Some places have wild flowers in meadows.</i>
<i>Species of Falcon</i>
<i>Swans and ducks</i>
<i>The amount of hedgerows and plants appearing after quite a long absence of doing anything.</i>
<i>The number of rats about.</i>
<i>The trees have increased.</i>
<i>Tree felling in Brazil</i>
<i>Tree/forest planting</i>
<i>Trees</i>
<i>Trees</i>
<i>Water Vole Repopulating in small areas.</i>
<i>Water voles</i>
<i>Water voles, seals</i>
<i>Wild birds, wolves in Scotland</i>
<i>Wildfowl park, more wild birds.</i>
<i>Wildlife increased in Witton-le-Wear</i>
<i>Wolves</i>
<i>Wood pigeons, more wildlife around the beck. I've seen a heron.</i>
<i>Wrens in the Denes</i>

The existence / creation of local conservation / nature areas

<i>At Kielder Forest and rats are in town centres.</i>
<i>Big Waters is greener now, there are more plants.</i>
<i>Bio Domes.</i>
<i>Botanical Gardens Durham.</i>
<i>Butterfly world.</i>
<i>Cheviots and Holy Island.</i>
<i>Chopwell Woods - more plants about</i>
<i>Chopwell Woods has more wildlife about.</i>
<i>Coastal regions - encouraging new species</i>
<i>Countryside.</i>
<i>Gateshead, Derwenthaugh, has new woods.</i>

<i>Great North Forest</i>
<i>Great North Forest, Sunnyside</i>
<i>Green belt - more greenery appearing.</i>
<i>Hardwick Hall wetlands area. Kielder Forest.</i>
<i>In the renovated parks - new parks, new programmes.</i>
<i>Jesmond Dene</i>
<i>Kielder</i>
<i>Kielder</i>
<i>Kielder Forest</i>
<i>Kielder Forest</i>
<i>Kielder Forest</i>
<i>Kielder Forest</i>
<i>Kielder Forest.</i>
<i>Man-made lakes in Burradon and waggonways (Killingworth)</i>
<i>More wildlife farms open.</i>
<i>More woodlands are better kept nowadays.</i>
<i>Morpeth - lots of wildlife (foxes and deer)</i>
<i>Natural beauty area - headland area. Footpaths around river and country.</i>
<i>Nature Reserve in Morpeth</i>
<i>Parkland</i>
<i>Power station, Haverton Hills, Seal Sands</i>
<i>Rainton Meadows - Jo's pond which was a pit heap</i>
<i>Rising Sun Country Park</i>
<i>Rising Sun Farm - Wallsend</i>
<i>Rivers</i>
<i>The farms, the surrounding lands</i>
<i>Town centres</i>
<i>Washington Wildfowl Park</i>
<i>Water Park at Seaton Carew and Billingham</i>
<i>West Park development, new park built.</i>
<i>Wetlands</i>
<i>Wetlands, Sunderland's direction wildlife, Coxhae and Kellae.</i>
<i>Wildfowl Park</i>
<i>Wildlife Park</i>
<i>Woodland area by Morton Park Way on A66</i>
<i>Woodland Parks</i>
<i>Woodland, cleaning rivers, Herrington Park.</i>
<i>Yorkshire.</i>

Positive change in attitude and behaviour towards the environment

<i>By going back to cooking from scratch, no fast food with packaging to get rid of.</i>
<i>It's getting people to eat healthily and reducing the amount of cars in cities.</i>
<i>Near Equator it increasingly getting hotter.</i>
<i>Near Stockton On Tees area (Corealng) fuel from the plants.</i>
<i>People are more aware of the environment now</i>
<i>People are trying more about green issues.</i>

<i>Pollution from cars - going towards cleaner fuel.</i>
<i>Recycle more, we are a lot more greener. Birds on the increase. Newcastle airport trying to do more on the green belts.</i>
<i>Recycling has increased.</i>
<i>There has been some conservation.</i>
<i>There is more conservation going on.</i>
<i>They are attempting to cut down on pollution.</i>
<i>Waste collection has increased.</i>
<i>We are slowly becoming more 'green' and looking after the environment.</i>
<i>With all that is happening to encourage people to take care of the environment.</i>

Other

<i>Bats something about them living areas, does recycling help?</i>
<i>Because a lot of buildings are populated</i>
<i>Believe efforts are made.</i>
<i>Bigger industrials are being made more aware of issues. Deer is better.</i>
<i>Building more houses in the countryside.</i>
<i>Can't do much. Don't know. More dying out in the wild.</i>
<i>Diversification in farming, for example organic.</i>
<i>Environment warming - species now surviving. Release of Red Kites</i>
<i>Everyone for himself.</i>
<i>Everywhere - no space for fresh air.</i>
<i>Extra housing destroys them, none in particular.</i>
<i>Farm diversity schemes - bringing back natural habitats.</i>
<i>Farming practices changing to conserve wildlife.</i>
<i>Hacking a lot of the area down where I live to make way for new flats.</i>
<i>More aware of it nowadays.</i>
<i>More done to help the environment.</i>
<i>New houses are using the green belts.</i>
<i>No cats, should be made to where bells on their collars.</i>
<i>only the being saved.</i>
<i>People are more interested in food and where it's from.</i>
<i>Set aside - barriers of 3 metres to increase in corn fields.</i>
<i>The way we live: we don't live off the land as much</i>
<i>Wildlife because of production on marshes and green land.</i>
<i>Willow coppicing in North Northumberland, Biouel Plant Hartlepool.</i>

Mixed categories

<i>A big clean up of Newbiggin Beach.</i>
<i>A conservation area at the back of Engine Road.</i>
<i>A particular bird re-introduced into the wildlife park</i>
<i>Attempts are made to increase plant life and animals. Loss of habitat makes it impossible.</i>
<i>Modern farming methods. Loss of farm barns. Chemical usage. Little pockets in curtain areas some times escape this loss and habitat remains untouched so continues to remain stable or</i>

<i>increases.</i>
<i>Bird of prey re-introduced, Red Kite.</i>
<i>Bird sanctuary in the area. Cut down on carbon.</i>
<i>Birds are being re-introduced.</i>
<i>Branksome have improved on the wasteland and planted trees.</i>
<i>British Steel (Corus) have introduced nature reserve inside the industrial perimeter.</i>
<i>Building nature reserves</i>
<i>Castle Eden Dene, the butterfly sanctuary.</i>
<i>Centre Parcs reintroducing the red squirrel. Osprey coming back to the North East.</i>
<i>Conservation areas being built</i>
<i>Conservation is good in the North East with the replacement of plants and trees.</i>
<i>Deer at Witton Castle.</i>
<i>Eden which is a project that plants trees and looks after the wildlife.</i>
<i>Falcons and other birds of prey have been re-introduced to try to increase their numbers.</i>
<i>Few open spaces in Teesside now for wildlife expansion.</i>
<i>Forests and parks are being gradually improved and plants and animals are thriving.</i>
<i>Gateshead City Centre lots of flowers about.</i>
<i>Gosforth Park there seems to be more animals about.</i>
<i>Great North Forest - Red Kites</i>
<i>Greenbelt land protected.</i>
<i>Hardwich Park - re-flooded lake to encourage wildlife.</i>
<i>Hartlepool power station, bird sanctuary and plants and marsh land.</i>
<i>Hawks brought in from Spain to a new habitat.</i>
<i>In the forest new trees. Along by riverside schools getting involved. More squirrels.</i>
<i>Increased bluebells locally and been protected red squirrels.</i>
<i>Introduction of Red Kites.</i>
<i>Kesrels at Kielder</i>
<i>Kielder - protecting the grey squirrel</i>
<i>Kielder Dam: helped the squirrels, planted trees and helped nature.</i>
<i>Kielder, also red squirrels and red kites have started to breed again.</i>
<i>Kites - reintroduced to the area</i>
<i>Moorlands have been created to attract certain species. Introduction of red kites in Gateshead.</i>
<i>More being planted and more animal parks.</i>
<i>More nature reserves like near the prison and natural woodland areas preserved.</i>
<i>More planting around the villages, especially plants and summer flowers.</i>
<i>More planting of plants and trees.</i>
<i>More rare birds introduced, for example dragon flies and humming flies.</i>
<i>More wildlife areas opening up in rural areas. More parks/grass areas opening up within new housing estates, encouraging birds and insects.</i>
<i>Mussels are being saved for re-stocking</i>
<i>National Parks are conserving and preserving.</i>
<i>No, but I do know certain areas have been returned to their original state.</i>
<i>Not for sure, think wild life preserved.</i>
<i>Not sure but am aware of certain animals being reintroduced into areas where they have become extinct.</i>
<i>Nothing only in protecting pond life.</i>
<i>Otters, building nature reserves.</i>
<i>Our school is planting trees, nature reserves are increasing in the North East.</i>
<i>Parks, plants are being planted and trees.</i>

<i>People are planting more trees</i>
<i>People bring plants from abroad</i>
<i>Planting a lot of trees.</i>
<i>Planting more trees rather than farm the area</i>
<i>Planting trees to make up for the ones cut down as a condition of building houses where trees were.</i>
<i>Plants introduced in some nature reserves, protected bluebells.</i>
<i>Possibly bats as they are protected.</i>
<i>Preserving wild life areas.</i>
<i>Preserving wildlife areas, plants and birds.</i>
<i>Protect the Argus Butterfly, protect wild orchids.</i>
<i>Putting flower beds around the town</i>
<i>Quite a few plants are being planted around towns now.</i>
<i>Red Kite and other birds of prey species. Red squirrels, protection of water voles and otters.</i>
<i>Red kite. Attempts to increase Red Squirrels in creasing trees to replace conifers. Trees that are our native species.</i>
<i>Red kites have been introduced in Tyne Valley.</i>
<i>Red Kites put back.</i>
<i>Red kites reintroduced at Gateshead, rejuvenating farmland back to marshland for wildlife.</i>
<i>Red kites re-introduced back into the wild.</i>
<i>Reintroduced birds of prey - buzzards. Seeing more sparrows and noticing more different types of birds.</i>
<i>Re-introducing falcons and kites.</i>
<i>Release of Red Kites.</i>
<i>Restructuring woodlands to help biodiversity.</i>
<i>Ret kite reintroduction in Gateshead.</i>
<i>River Tyne is getting cleaner.</i>
<i>River Tyne, salmon are appearing.</i>
<i>Rural areas, council have replanted trees.</i>
<i>Saltwell Park was been redone - plants and animals re-introduced.</i>
<i>Saltwell Park, more plants are being grown.</i>
<i>Saplings planted at Doxford</i>
<i>Some birds up Consett way have been reintroduced.</i>
<i>Starting to pay more attentions to parks..</i>
<i>The wildlife centres.</i>
<i>There are lots of new areas being transformed into wildlife areas where housing developments are.</i>
<i>Trees - planting.</i>
<i>Trees being planted around Kielder.</i>
<i>Trees planted around places.</i>
<i>Trying to save the red squirrels.</i>
<i>Two new species of birds introduced into Gateshead.</i>
<i>Tyne has got better, there is better salmon here now.</i>
<i>Various wildfowl parks are coming up nowadays, to look after endangered species</i>
<i>Water Voles and Otters brought back.</i>
<i>We are doing more to develop woodlands etc, so that the species do not die out.</i>
<i>West park Faverdale Darlington has provided a wildlife area amongst it's new housing development.</i>
<i>West Park Faverdale, there is a wildlife area amongst the new housing developments.</i>
<i>West Park have put in bird boxes.</i>

<i>Wet lands, seal sands, bird sanctuary and Kirth Leatham.</i>
<i>Whessoe Pond has been brought back as a wildlife sanctuary.</i>
<i>Wild birds and being re-introduced.</i>
<i>Wildlife conservation in the pit villages - revitalizing those areas.</i>
<i>Wildlife ponds landscaped which have brought in birds.</i>
<i>Woodland Trust / National Heritage</i>

1.3 Can you give any examples, you are aware of where biodiversity in the North East has decreased or is decreasing? (Q6)

<i>A housing increase on a lot of farmland.</i>
<i>A local woodland is being neglected.</i>
<i>A lot more development of houses destroying the landscape.</i>
<i>A lot more new houses being built in the area.</i>
<i>A1 - new building/Shiremoor</i>
<i>All over</i>
<i>All the building on the open spaces on the edges of towns.</i>
<i>All the building work</i>
<i>All the building work</i>
<i>All the building work going on.</i>
<i>All the building works going on.</i>
<i>All the construction threats going on.</i>
<i>All the factories polluting the air, and too many vehicles on the road</i>
<i>All the houses on green areas and carbon emissions.</i>
<i>All the new buildings going up on any bit of open space</i>
<i>All the new houses and factories being built</i>
<i>All the new housing and industry that's being built all over the open spaces.</i>
<i>All the new industrial estates going up</i>
<i>All the open spaces being built on and destroyed.</i>
<i>All the poles are losing their ice caps.</i>
<i>Animals</i>
<i>Animals - less cows in the fields nowadays.</i>
<i>Animals and hedgerows' are getting less and less as they build more houses.</i>
<i>Animals.</i>
<i>Anywhere buildings are appearing, new houses.</i>
<i>Anywhere in the North East - lots of new houses destroying woodlands.</i>
<i>Anywhere where houses are built.</i>
<i>Anywhere where new building is going up.</i>
<i>Badgers</i>
<i>Barnes Park</i>
<i>Basically, cruelty where animals are concerned. People don't have the same attitudes to habitats. Not enough people care.</i>

<i>Bats and owls. Part of Seal sands in Hartlepool has been (hard to read) for yet more development.</i>
<i>Bats, although they are protected species, are decreasing.</i>
<i>Beach rubbish - they need to be cleaner.</i>
<i>Because lots of houses being built on the habitat</i>
<i>Because of development.</i>
<i>Because of new builds</i>
<i>Because of the new buildings going up</i>
<i>Because there is lots of development on fields, being used for houses and supermarkets.</i>
<i>Because there's not the trees and such now</i>
<i>Big apes, forest going in the world.</i>
<i>Billingham, chemical plants destroying the area.</i>
<i>bird life - sparrows</i>
<i>Bird pollution, for example there are no sand eels now.</i>
<i>Bird species, Red Squirrels</i>
<i>Birds</i>
<i>Birds</i>
<i>Birds - chaffinches and bluetits probably due to flooding on a pretty regular basis.</i>
<i>Birds - not as many species.</i>
<i>Birds and hedgerows getting less and less especially sparrows, blue tits and robins.</i>
<i>Birds and smaller mammals.</i>
<i>Birds are becoming more rare compared to a few years ago in the garden.</i>
<i>Birds are being seen less for example we don't see sparrows as much now.</i>
<i>Birds are disappearing off the streets.</i>
<i>Birds are dropping in number.</i>
<i>Birds are getting less and less.</i>
<i>Birds disappearing from gardens - no trees.</i>
<i>Birds getting less, for example Trustless, Swallows, Blue tits and Sparrows.</i>
<i>Birds have definitely decreased due to loss of natural habitat which is being used for building purposes.</i>
<i>Birds in garden are rarer now.</i>
<i>Birds in gardens have decreased probably due to building more houses.</i>
<i>Birds in general. Buildings are responsible.</i>
<i>Birds in less numbers generally these days.</i>
<i>Birds in the garden.</i>
<i>Birds of certain types are not now coming into the gardens.</i>
<i>Birds, certain types - Bluetits, Chaffinches</i>
<i>Birds, sparrows and starlings.</i>
<i>Birds.</i>
<i>Birds.</i>
<i>Birds.</i>
<i>Birds.</i>
<i>Birds.</i>
<i>Birds: sparrows, thrushes and red squirrels.</i>
<i>Black Grouse</i>
<i>Building all over the North East, lots of new buildings.</i>
<i>Building all over.</i>
<i>Building and pollution.</i>
<i>Building areas.</i>

<i>Building greenfield sites</i>
<i>Building houses etc.</i>
<i>Building in Winlaton, there are new houses on green areas.</i>
<i>Building more houses on green belts.</i>
<i>Building more houses will affect the natural habitat.</i>
<i>Building new all over the place.</i>
<i>Building of new houses on green fields.</i>
<i>Building on green belts</i>
<i>Building on green belts.</i>
<i>Building roads and housing estates.</i>
<i>Building three flats - no gardens to them.</i>
<i>Building to many houses and flats takes away the natural habitats of plants and animals.</i>
<i>Building too many flats and houses which removes the natural habitat of birds, animals and plants.</i>
<i>Building too many houses on green belt.</i>
<i>Building too much in the area is killing off wildlife</i>
<i>Buildings are all around where there used to be open spaces.</i>
<i>Buildings are destroying habitats for wildlife.</i>
<i>Buildings going up everywhere.</i>
<i>Buildings going up.</i>
<i>Buildings/too many projects for industrial estates and out of town developments.</i>
<i>Built houses on green fields.</i>
<i>Built up areas and industrial estates.</i>
<i>Built up areas taking up farmland and given areas where there is more wildlife. Road extensions taking up hedges and fields and so on.</i>
<i>Burning the rubbish at Deptford; burying rubbish.</i>
<i>Car emissions are decreasing in Britain.</i>
<i>Certain wild flowers, can't cope with the loss of habitat and modernised farming motions. I would say most animals apart from rabbits are on the decline. You only have to look at the sprawling urbanization to realise this.</i>
<i>China's over pollution.</i>
<i>Chopping trees down.</i>
<i>Climate change is decreasing everything.</i>
<i>Climate change is decreasing the number of birds.</i>
<i>Climate change is encouraging birds to go to other places, too</i>
<i>Coastal areas - Tynemouth and Whitley Bay</i>
<i>Cod in the North Sea. Voles. Some bird types.</i>
<i>Countryside, both just at a balance at the moment.</i>
<i>Crested Newts - habitats around Darlington are being lost to housing.</i>
<i>Cutting down forests and building on the last green areas in town.</i>
<i>Cutting down the woods and not replanting the same trees but quick growing ones for profit.</i>
<i>Cutting down trees and building houses may have decreased wildlife.</i>
<i>Cutting trees down to build new homes</i>
<i>Cutting trees down.</i>
<i>Decreasing badgers; birds not being seen.</i>
<i>Developing more open land so therefore destroying more animal habitat.</i>
<i>Developments are destroying habitats.</i>
<i>Don't know just the static caravan areas.</i>
<i>Don't know think you can get wild flower meadows and people don't respect them.</i>

<i>Don't see as many birds out and about, for example sparrows.</i>
<i>Durham city centre loss of green areas, been build on and made into car parks. Just aware of the constant loss of grass areas lost because of building flats and houses.</i>
<i>Durham City Centre, woods and river. Bank loss of wildlife and habitat to buildings and housing.</i>
<i>Eagles.</i>
<i>Everywhere in the North East - new houses being built.</i>
<i>Everywhere they are building houses they are taking away green belts.</i>
<i>Everywhere where new building is happening.</i>
<i>Everywhere where new houses are being built.</i>
<i>Everywhere!</i>
<i>Everywhere!</i>
<i>Everywhere, as pollution is all around.</i>
<i>Expansion of development.</i>
<i>Fields not being used to full advantage.</i>
<i>Fish</i>
<i>Fish - running out of cod.</i>
<i>Fish in the North sea, garden birds. With the encouragement of new developments out of town, shopping centres, housing estates, towns are expanding all the time. It is inevitable that all plant life, animals and insects are reducing in numbers in smaller areas.</i>
<i>Fish stocks have gone down.</i>
<i>Fly life not as much as ten years ago - I go fishing and you need flies to attract the fish.</i>
<i>Foot and mouth</i>
<i>Forest birds - due to loss of habitat. Butterflies have also decreased.</i>
<i>Fossway open spaces are now with houses.</i>
<i>Foxes are dwindling.</i>
<i>Foxes are urbanized. They are hunted so badly they have to come into urban areas. Badgers are the same as foxes.</i>
<i>Foxes have been driven out of their natural habitat due to more building work taking place on open land.</i>
<i>Foxes, Badges and Rabbits.</i>
<i>Foxes, swallows, flytipping, rabbits, badgers, voles and shrews, gray crows.</i>
<i>Garden birds sparrows, robins and starlings, the list is endless.</i>
<i>Garden birds, butterflies and hedgehogs.</i>
<i>Garden birds, hedgehogs, badgers because their habitats are being developed and population has expanded.</i>
<i>Garden birds.</i>
<i>Garden Birds.</i>
<i>Gardens - all getting paved over so people are getting rid of plants.</i>
<i>General areas in the North East have lots of new housing.</i>
<i>Generally all over the North East are lots of new estates being built.</i>
<i>Getting rid of our green belts to property developers.</i>
<i>Global warming, chopping down rain forests all over is decreasing natural habitat</i>
<i>Gosforth, lots of new housing being built on green belt land.</i>
<i>Gosforth, new houses being built on open land.</i>
<i>Grass areas - they are being used for building houses and flats.</i>
<i>Green areas are being over developed , there are too many flats. Major loss of land to developments so loss of habitat.</i>
<i>Green belt - disappearing e.g. North Gosforth, developing Gosforth racecourse.</i>
<i>Green belts being used for housing.</i>

<i>Greenbelt forests.</i>
<i>Greenbelt.</i>
<i>Greenland.</i>
<i>Grey squirrels are taking over the red ones. Hedgerows are disappearing and wild animals have no where to go. Roads are responsible for killing wild animals.</i>
<i>Growth of housing taking over greenland areas</i>
<i>Hardly any land left - it's all being built on - houses everywhere</i>
<i>Haughton where the new road to the A66 is being built and they are taking away the green fields.</i>
<i>Heard of squirrels decreasing in numbers.</i>
<i>Heard that squirrels are getting harder to find and less robins as well.</i>
<i>Hedgehogs and horse chestnut trees.</i>
<i>Hedgehogs, plants are flowering out of season .</i>
<i>Hedgehogs, Sparrows are low in numbers.</i>
<i>Hedgehogs.</i>
<i>Hedgehogs.</i>
<i>Hedgerows and shrubs being destroyed by builders.</i>
<i>Hedgerows being dug up.</i>
<i>Hedgerows disappearing, chemicals in rivers and streams killing creatures.</i>
<i>Hedgerows, sparrows, dormice, harebells, spotted orchids, cowslips, native bluebells, primroses. So much has been lost. Owls barns are now constructed into homes. Natural habitat is constantly being destroyed in the name of process. Excessive building of houses to house people why? Over use of pesticides and insecticides causes loss of natural hedgerow. Durham City ripped out the ancient hedgerows for park and ride only to replant them. Crazy!</i>
<i>Hedges taken out of farmland.</i>
<i>Houses anywhere they find land</i>
<i>Houses estates all over the North East on green land.</i>
<i>Housing appearing on green areas.</i>
<i>Housing being built on greenbelt land.</i>
<i>Housing developments taking over a lot of land.</i>
<i>Housing on green belt land.</i>
<i>How can it increase when thousands of acres are lost to development every year.</i>
<i>I don't see as much variety around now.</i>
<i>I don't think so many plants or trees are being planted.</i>
<i>I don't think we make enough effort and there is too much development going on, new houses and apartments.</i>
<i>I only know that there is a lot of building going on and a lot of it expands into the countryside and it shouldn't.</i>
<i>In run down areas where everything is ruined.</i>
<i>In towns - building work</i>
<i>In towns - more commercial buildings destroying natural habitat.</i>
<i>In towns - no trees.</i>
<i>Increasing housing on the green belt.</i>
<i>Insects, because of building works.</i>
<i>It limits our resources if we lose trees and plants.</i>
<i>It's all over with too much housing going on.</i>
<i>It's all the new building and rubbish left lying around.</i>
<i>It's decreasing - all the factories in Middlesbrough causing pollution.</i>
<i>It's just you don't see many birds or squirrels. We used to get loads, now we don't. Probably global warming.</i>

<i>I've not heard cuckoos for ages and haven't any bees this year.</i>
<i>Jesmond Dene - loss of animals</i>
<i>Jesmond Dene and the green belt have become smaller.</i>
<i>Jesmond Dene has less animals.</i>
<i>Just more land is taken up with more housing and roads so countryside is lost.</i>
<i>Kielder when it was flooded.</i>
<i>Kestrels, Sparrow Hawks, Birds of prey and owls in my local area.</i>
<i>Killing trees / pollution</i>
<i>Lack of sparrows about.</i>
<i>Ladybirds, Hedgehogs.</i>
<i>Lake district and Kielder forest.</i>
<i>Land around Durham being developed for new offices and trading estates.</i>
<i>Land, anywhere, on outskirts of towns for building</i>
<i>Lazy Councillors.</i>
<i>Leaflets through the door and read a bit more about it.</i>
<i>Less birds and hedgehogs.</i>
<i>Less birds in my garden nowadays.</i>
<i>Less birds, owls and squirrels.</i>
<i>Less farm lands now as everyone is building new homes on them.</i>
<i>Less fish in the rivers and probably due to pollution, my husband is a fisherman and comments on the smaller numbers of fish now in the rivers.</i>
<i>Less green land and more houses and buildings.</i>
<i>Less orchids around now.</i>
<i>Less singing from birds e.g. Sparrows, Robins around now.</i>
<i>Less woods.</i>
<i>Local area Durham due to development.</i>
<i>Local nature reserve with pond not one duck has been on it this year.</i>
<i>Losing a lot of natural habitat</i>
<i>Losing different types of birds and plants.</i>
<i>Losing more animals because of man building all over on green belts.</i>
<i>Losing wildlife and habitat from farmland. Grubbing up of hedges to make larger fields pesticides and insecticides, chemicals are used all over. So we loose plants and the habitat of animals so we create a chain reaction which ultimately affects us all with eventually devastating affects.</i>
<i>Loss of habitat through the re-development of houses and offices.</i>
<i>Loss of land to building</i>
<i>Loss of red squirrels in Northumberland.</i>
<i>Loss of starlings in my gardens. Have you got all day.</i>
<i>Lost bird species</i>
<i>Lots of birds, hedgerows, lots of wildlife. Too many flats particularly round (hard to read). Building (hard to read).</i>
<i>Lots of building work - no open spaces left.</i>
<i>Lots of buildings, new college in the North East.</i>
<i>Lots of development in Great Park Gosforth.</i>
<i>Lots of green belt areas used for housing.</i>
<i>Lots of new houses taking up farmland.</i>
<i>Lots of new woodland and using green belts to build on.</i>
<i>Marsden - decrease of birds</i>
<i>More and more land in taken for buildings and this destroys natural habitat for animals and plants.</i>

<i>More housing is destroying green land</i>
<i>Morpeth has new housing on the outskirts of the town.</i>
<i>Most land is being built on now, too many houses.</i>
<i>Most of the North East has new houses and buildings.</i>
<i>My garden, no hedgehogs and there are lots of birds that you don't see anymore.</i>
<i>Natterjack Toad, House Sparrow.</i>
<i>Natural habitat is being lost with all the new houses being built, the country is being swamped with houses which is causing flooding because of too much concrete.</i>
<i>New buildings all over the place.</i>
<i>New buildings are taking over such large areas that wildlife is suffering in some areas. Everywhere that there are spare pieces of land houses and flats appear.</i>
<i>New buildings don't take into account any wildlife in that area.</i>
<i>New buildings going up all over and towns spreading out.</i>
<i>New developments are taking over all the land.</i>
<i>New developments being built everywhere.</i>
<i>New houses and roads being built.</i>
<i>New houses are being built on Northumberland Park.</i>
<i>New houses being built at Kingston Park on farmland.</i>
<i>New houses being built in lots of areas.</i>
<i>New houses being built on green belt land.</i>
<i>New houses being built on natural habitats.</i>
<i>New houses being built.</i>
<i>New housing estates being built everywhere.</i>
<i>New roads on green belt land.</i>
<i>Newcastle centre there are many new buildings.</i>
<i>Newts.</i>
<i>Newts.</i>
<i>No birds in our garden and taking over the green belts.</i>
<i>No cod in sea. Stock has been over-caught.</i>
<i>No open areas in towns.</i>
<i>No red squirrels now.</i>
<i>No sparrows about where I live.</i>
<i>North Yorks Moors</i>
<i>Northumberland Park - new housing</i>
<i>Northumberland Park there is all new housing.</i>
<i>Not as many rabbits about.</i>
<i>Not enough being done, still too much pollution.</i>
<i>Not enough recycling or environmental work being done.</i>
<i>Not really can only think of all housing, erosion to given belts.</i>
<i>Not so many birds in the garden now.</i>
<i>Not so many blue-tits and some wild birds.</i>
<i>Number of birds in my garden - sparrows, blackbirds, thrushes and robins.</i>
<i>On spare grassland where new houses are getting built.</i>
<i>Only the buildings/ golf course being redeveloped. University development on green areas in Durham.</i>
<i>Outskirts of city - expanding with new houses.</i>
<i>Outskirts of city getting built on with houses. Taking away green areas which should be protected.</i>
<i>Overbuilding</i>

<i>Owls and hedges.</i>
<i>Penshaw - where the forests have been damaged by young school boys.</i>
<i>People have removed the privets so can't make nests</i>
<i>People make bonfires in the woods. People are cutting down trees for the fires.</i>
<i>Pesticides are destroying species.</i>
<i>Plants associated with water and ponds. Newts, frogs and toads. Garden birds, for example sparrows. thrushes, loss of garden birds is the reason why we have so many slugs and snails now.</i>
<i>Plants being dug up for new houses and they don't grow back.</i>
<i>Plastic tunnels in farms - no room for wildlife.</i>
<i>Pollution causing plants to die.</i>
<i>Quayside, new buildings being built.</i>
<i>Quite a lot of wildlife not returning here now owing to global warming.</i>
<i>Quite a lot on some sites if natural interest but I can't think where.</i>
<i>Red and grey squirrels on the decline.</i>
<i>Red Squirrel</i>
<i>Red Squirrel</i>
<i>Red Squirrel</i>
<i>Red Squirrel</i>
<i>Red Squirrel and Sparrows population.</i>
<i>Red squirrel disappearing, too many grey squirrels.</i>
<i>Red Squirrel, trees.</i>
<i>Red squirrel.</i>
<i>Red squirrel. The land is swallowed by too much developments of roads. For example the road from Sherburn to Bowburn is a massive road, what for, it has cost a lot of country road and destroyed habitat.</i>
<i>Red Squirrels</i>
<i>Red Squirrels</i>
<i>Red squirrels are becoming more and more.</i>
<i>Red squirrels are decreasing all the time.</i>
<i>Red squirrels are getting rarer now.</i>
<i>Red squirrels are on the decline.</i>
<i>Red squirrels disappeared.</i>
<i>Red squirrels disappearing.</i>
<i>Red squirrels have been driven out of their natural habitat by grey ones.</i>
<i>Red squirrels out numbered by grey. Many garden birds, particularly sparrows. Many causes for this are some natural but mostly unnatural methods of farming. Over urbanization which also destroys habitat. Climate change also plays apart too, this I believe has been mainly caused by man too. Man is increasing and we have no predator apart from ourselves.</i>
<i>Red Squirrels, foxes</i>
<i>Red squirrels, Lady Slipper orchid and Green Finches in garden</i>
<i>Red squirrels.</i>
<i>Red squirrels.</i>
<i>Red squirrels.</i>
<i>Red Squirrels.</i>
<i>Red squirrels.</i>
<i>Red squirrels.</i>
<i>Red Squirrels.</i>
<i>Road building damaging natural habitats.</i>
<i>Robins and sparrows.</i>

<i>Ruma tangs.</i>
<i>Salamoudew and Newts not there in Wittan Park and the ponds in the fields.</i>
<i>Scottish Borders.</i>
<i>Seaside pollution on beach and sea itself kills wildlife.</i>
<i>Shiremoor, new houses are being built.</i>
<i>Small birds are decreasing e.g. Sparrows and Blue Tits.</i>
<i>Small birds don't see as much.</i>
<i>So many houses being built on the green spaces</i>
<i>Some birds have become extinct.</i>
<i>Some birds need feeding to keep them.</i>
<i>Some Birds.</i>
<i>Some of the smaller birds are becoming extinct</i>
<i>Some plants and animals are decreasing as nature takes its own course. Man's intervention can help prevent this or slow it down so it may be resolved at a future date. Hedgehogs, Red Squirrels, Otters, Badgers.</i>
<i>Some run-down places where everything has been flattened</i>
<i>Some wild birds are more rare nowadays.</i>
<i>Some wild birds decreasing in numbers due to less gardens left alone.</i>
<i>Song Thrushes and Sparrows</i>
<i>South African animals and swan numbers are decreasing.</i>
<i>South Park - Darlington - number of animals</i>
<i>Sparrowhawks have lost their habitat.</i>
<i>Sparrows</i>
<i>Sparrows</i>
<i>Sparrows and birds in general.</i>
<i>Sparrows and blue tits.</i>
<i>Sparrows and butterflies</i>
<i>Sparrows and Finches have decreased from our gardens.</i>
<i>Sparrows and Hedgehogs.</i>
<i>Sparrows and Starlings disappearing from gardens.</i>
<i>Sparrows and Starlings.</i>
<i>Sparrows are decreasing in gardens.</i>
<i>Sparrows are decreasing, along with bees and hedgehogs.</i>
<i>Sparrows, deer</i>
<i>Sparrows.</i>
<i>Sparrows.</i>
<i>Spoilt land used for housing.</i>
<i>Squirrels</i>
<i>Squirrels are in shortage now. Hedgehogs are hardly ever seen nowadays.</i>
<i>Squirrels Disappearing.</i>
<i>Squirrels getting less and less in this area.</i>
<i>Stockton - losing its value. It was vibrant, but not now.</i>
<i>Suburban areas where land is being snatched up for building and new houses. Cramlington school playing fields taken for housing, the list is endless as it is happening everywhere.</i>
<i>Swallows. Lots of other birds but can't remember them.</i>
<i>Teesside, new factories are killing parkland.</i>
<i>The birds and wildlife, starlings and sparrows, getting rarer.</i>
<i>The birds seem to have reduced in numbers, probably due to lots of new buildings.</i>
<i>The green areas built on private farm land going.</i>

<i>The Moors are more developed then they use to be.</i>
<i>The new houses being built into the countryside.</i>
<i>The number of new buildings is destroying natural homes.</i>
<i>The number of species no longer thriving, due to woodland areas being cut down.</i>
<i>There are more buildings on green land in town areas.</i>
<i>There is that much building going on and newts are decreasing.</i>
<i>There were less bees and butterflies about this summer.</i>
<i>They chopped down a green area in Darlington.</i>
<i>They seem to build houses everywhere now, no place for wildlife.</i>
<i>They're building everywhere, reducing green spaces.</i>
<i>They're building more</i>
<i>Threes getting cut down everywhere.</i>
<i>Through building works.</i>
<i>Too many houses being built.</i>
<i>Too many houses. Farm land taken for buildings.</i>
<i>Too many industrial estates</i>
<i>Too many new buildings and housing.</i>
<i>Too many new buildings erected on woodland and building houses on open land.</i>
<i>Too many new housing developments taking up the countryside.</i>
<i>Too much building going on. Problems for birds also.</i>
<i>Too much building is taking away natural areas.</i>
<i>Too much development. What little we try to do is a drop in the ocean in comparison of hedgerow destruction, over build, roads, etc, is doing to our countryside. Development (Concrete) is partially responsible for floods taking place in our country. This also affects biodiversity as I see it.</i>
<i>Too much housing destroys wildlife, pond life, birds and plants.</i>
<i>Too much pollution</i>
<i>Town centres, there are lots of new buildings.</i>
<i>Trees - natural habitat is being lost due to trees being chopped down and building work is being done everywhere.</i>
<i>Trees are being chopped down in order to make way for building houses and the wildlife is losing its natural habitat.</i>
<i>Trees being felled in Brazil.</i>
<i>Urban development</i>
<i>Vault Site at Sunderland</i>
<i>Voles and small wildlife.</i>
<i>Wastelands being built on.</i>
<i>Wastelands for birds - decreased.</i>
<i>Water voles, hedgehogs.</i>
<i>We are just not green enough, an attempt was made for us to be greener, but it's not really the case now.</i>
<i>We are losing our natural countryside to house building.</i>
<i>We lose a lot of trees every day.</i>
<i>Well maybe a middle haven because of new buildings.</i>
<i>West corn forth-nature reserve, they want to extend the quarry, so there would be less land.</i>
<i>Whales.</i>
<i>What I've read - birds disappearing due to climate change</i>
<i>When people in housing destroy the property and surrounding area, spoiling the country. No toads, fish in the ponds.</i>
<i>When they are building all the houses everywhere.</i>

<i>Where factories and developments are going up.</i>
<i>Where housing developments are.</i>
<i>Wild animal buildings and shelter have disappeared leaving them more open to problems.</i>
<i>Wild birds due to an increase in lots of new buildings of houses and flats which destroys natural habitat.</i>
<i>Wildlife, because of building works</i>
<i>Woodland being chopped down for housing.</i>
<i>Woodlands (don't know names)</i>
<i>Wrens & house sparrows</i>
<i>You hear a lot of animals getting killed and can't be replaced</i>
<i>You see red squirrels less and less.</i>

1.4 Please explain your answer to Q8 (Does biodiversity provide any practical benefits to our society), providing an example if you can (Q9):

Ecological Value

<i>A healthy balanced is provided in natural surroundings, but where there is a big reduction in these things everything suffers.</i>
<i>All animals and plants have a purpose and the loss of some upsets the balance of nature, for example more pests.</i>
<i>All life feeds off other things.</i>
<i>All living things are necessary to provide the correct balance and we rely on plants and animals to live.</i>
<i>Animals and birds keep pests under control and bees pollinate fruit trees etc.</i>
<i>Animals and plants are very important to survival.</i>
<i>Animals and plants work together in the environment, insects to worms all have a role to play.</i>
<i>Animals provide food for us.</i>
<i>Anything that keeps plants and animals we've got is good. They do tell us when things are going wrong.</i>
<i>Anything with a good balance must provide practical benefits.</i>
<i>As regard to plants it does and they soak up carbon dioxide.</i>
<i>Because you can get fresh air.</i>
<i>Bees make honey and spiders catch flies.</i>
<i>Better balance of life, opportunities for education. This whole system is balanced and easily goes out of sink with mans intervention.</i>
<i>Better for the environmental balance.</i>
<i>Bio Diversity of plants gives us great variety of food. Retaining woodlands areas increases the production of oxygen which we need.</i>
<i>Birds and plants make up a necessary part of life. We depend on them for food etc.</i>
<i>By cleaning our air. We would all perish if biodiversity failed to continue. Plants, wildlife, we all need each other to survive.</i>
<i>Carbon dioxide given off from plants. Natural well-being of humans when they experience the world of plants and animals.</i>

<i>Diverse fauna and flora makes the world go around.</i>
<i>Each animal makes its own contribution to the world.</i>
<i>Every lives off another and we live off animals.</i>
<i>Everything in agriculture and everything has to grow. Animals have to live.</i>
<i>Everything is interlinked, insects pollinate the plants, birds feed on the insects and so on, so we need everything. As nature has a balance.</i>
<i>Everything needs everything else. If it's gone, you cannot get it back.</i>
<i>Food comes from plants and animals.</i>
<i>Foods, the cycle of food in the chain.</i>
<i>For children. They won't be able to see wildlife. We need it for life. They all do their jobs.</i>
<i>For example of nature does its job properly humans benefit because the food chain improves and insects keep disease away.</i>
<i>Fresh air</i>
<i>Generally if we get to reckless with our eco-systems we will suffer unseen effects in the future. We should look after our planet.</i>
<i>Get people out and breathing fresh air.</i>
<i>Gives out oxygen and restores the balance in the world.</i>
<i>Gives us a greener, healthier climate to live in.</i>
<i>Gives us fresh air and beauty.</i>
<i>Gives us fresh air and open spaces, for natural environment.</i>
<i>Gives us fresh air.</i>
<i>Got to have animals to kill of flies. It's a circle. Keeps it all going.</i>
<i>Happier people from contact with animals. Oxygen is provided from plants.</i>
<i>Healthier Eco-system and nicer places to live.</i>
<i>Helps plants get rid of carbon dioxide</i>
<i>I can't think of anything in particular but it must be a positive step to have a proper balance of plants and animals.</i>
<i>I like to see the animals and plants make oxygen.</i>
<i>I suppose it helps stop animals from becoming extinct, by preserving the woodland areas.</i>
<i>I think we need wildlife and plants for us to breathe properly</i>
<i>I you are losing the animals and plants it will have an knock on affect on the environment.</i>
<i>If an animal becomes extinct, we might not survive.</i>
<i>If flowers and plants survive in the natural state it keeps the balance of nature as it should be.</i>
<i>If it's good, more likely to have an environment able to cope; a more balanced ecosystem.</i>
<i>If there is a proper balance in nature then everything prospers.</i>
<i>If we didn't have plants etc, we couldn't survive.</i>
<i>If we don't keep things in check, ultimately we'll give problems for the natural order/species like midges - natural evolutions - not being eaten by rabbits, foxes etc.</i>
<i>If we grow more then we don't rely on other countries for crops.</i>
<i>If you don't have bees to pollinate plants, plants die.</i>
<i>If you have birds then the worms get eaten.</i>
<i>If you lose animals in hedgerows, it breaks down the food chain.</i>
<i>If you lose animals out of the eco-structure it affects everything and everybody.</i>
<i>Improves the air quality</i>
<i>In general bringing harmony to a lot of natural cycles. Variety to life cycles.</i>
<i>In order to live healthy lives we need bio-diversity. Plants and trees give us oxygen. We need animals and plants etc. It keeps everything balanced. Destroy the balance and we eventually destroy ourselves as we are experiencing now. The word needs massive birth control for Homo Sapiens.</i>
<i>Intertwining environment means everything depends on other things - people, animals and</i>

<i>plants.</i>
<i>It affects the oxygen level and the ozone layer.</i>
<i>It balances ecology - animals feed off plants, plants give oxygen.</i>
<i>It gives more oxygen into the atmosphere.</i>
<i>It gives us a better balance of natural resources, therefore a better climate and a better lifestyle.</i>
<i>It helps life to exist, everything feeds off everything else.</i>
<i>It helps stop animals and plants dying out.</i>
<i>It helps with carbon dioxide emissions (plants)</i>
<i>It keeps a healthy balance between wildlife and plants.</i>
<i>It keeps the balance</i>
<i>It keeps things right - a good balance.</i>
<i>It makes us healthier - fresh air in the environment and no smoke pollution.</i>
<i>It puts the balance out of synch if too much vegetation and forests are chopped down.</i>
<i>It shows development of natural life, how it's related. It is dependent on each other.</i>
<i>It stops animals and plants from dying out.</i>
<i>It stops things from becoming extinct. Wildlife, trees and plants.</i>
<i>It supports a wider food chain.</i>
<i>It's a natural evolvement between man and nature.</i>
<i>It's all a wildlife chain and for pharmaceutical purposes.</i>
<i>It's all the food chain. Without one part, we could be in trouble. It helps with the environment.</i>
<i>It's all to do with oxygen levels we take in and plants give out.</i>
<i>It's essential to society for existence.</i>
<i>It's getting rid of plants, getting rid of one to create another. Just going round in circles.</i>
<i>It's good for life - produces oxygen.</i>
<i>It's important otherwise our environment will change. It keeps the environment as it is.</i>
<i>It's like evolution, where animals and people live together.</i>
<i>It's the food chain.</i>
<i>Just seeing things like plants and animals makes people see the balance needed to make nature work properly.</i>
<i>Keeps a balance in nature</i>
<i>Keeps food balance right. Once something goes it has a knock-on effect on everything else.</i>
<i>Lets us relax and breathe in clear air.</i>
<i>Look after each other and each do our own job to look after society.</i>
<i>Lose a lot of oxygen and need living trees and everything that supplies them.</i>
<i>More biodiversity, more protection against things being wiped out.</i>
<i>More fresh air, natural nature.</i>
<i>More fresh air/natural.</i>
<i>Natural cycle of living things. No owls - more rats and mice. No owls - too many barn conversions.</i>
<i>Nature is important to help us maintain balance.</i>
<i>Nature remains properly balanced and when one aspect of nature thrives everything else improves as well.</i>
<i>Never know how these plants can help us.</i>
<i>One feeds the other. It's sustainability - if you lose one, you lose the chain.</i>
<i>Otherwise inbreeding would start so we need biodiversity - natural aspect. Rats, multiplying - needs control.</i>
<i>Oxygen levels.</i>
<i>Oxygen. We can seek refuge in the country to cut away from today's fast life, we need a balance of living things to prevent species domination.</i>

<i>Plants are good for life as they give us oxygen.</i>
<i>Plants create oxygen and counter carbon emissions.</i>
<i>Plants give off oxygen - helps everyone.</i>
<i>Plants give off oxygen which we breath.</i>
<i>Plants give off oxygen which we need to stay alive.</i>
<i>Plants help bees, bees help us etc.</i>
<i>Plants provide chemicals for us. Animal cycles help keep the cycle going. The cycle of nature and wildlife. Lose one animal and we lose the balance.</i>
<i>Plants we need for the air, we breath.</i>
<i>Plants, animals and insects need to be in the right proportions to make everything work. Once the balance becomes tipped things go wrong.</i>
<i>Pleasure of seeing animals etc. One needs the other to keep creatures living.</i>
<i>The air we breathe enriches our life. We need nature all around us.</i>
<i>The fresh air</i>
<i>The trees are generating oxygen.</i>
<i>The trees keep the air clean.</i>
<i>They are all inter-related, all need each other to survive.</i>
<i>They provide us with food.</i>
<i>Things lower in the chain help those above the chain leading to us.</i>
<i>To provide oxygen, people need open spaces and countryside.</i>
<i>Trees bearing fruit is important for mini beasts and the life cycle. It would benefit young children from learning about nature and life, for example energy and recycling are all main issues now.</i>
<i>Trees convert oxygen for us to breathe.</i>
<i>Trees give oxygen and take in carbon dioxide.</i>
<i>Trees produce oxygen so clean air.</i>
<i>We breathe the air around us and plants provide oxygen.</i>
<i>We can't afford to lose animals and plants, they all have a function.</i>
<i>We can't survive without it. It's the cycle of life. We all need each other - lost something and everything gets affected.</i>
<i>We don't know what kind of damage we are doing. Could have a dangerous knock on affect if we lose any individual species.</i>
<i>We live off animals and plants and they live off each other.</i>
<i>We need a proper balance between plants and animals to make everything work properly.</i>
<i>We need animals and insects because we all feed off each other.</i>
<i>We need animals and insects to live. They pollinate fruit trees and keep a proper balance.</i>
<i>We need birds to get rid of vermin.</i>
<i>We need both for survival.</i>
<i>We need diverse plants, animals and insects, in order to survive. Without this we would be dead, over run with whatever.</i>
<i>We need plants and all animal life.</i>
<i>We need plants and animals and food.</i>
<i>We need plants and animals to provide food.</i>
<i>We need plants and animals to survive for food.</i>
<i>We need plants and insects to keep the food we eat at a proper balance.</i>
<i>We need plants to provide oxygen, to live.</i>
<i>We need plants to survive.</i>
<i>We need plants, animals and nature for our society to live in.</i>
<i>We need the wilder hybrids to keep us going. What we eat becomes less resistant to disease so we need a large variety of plants which keep changing their form. We can't lose rain forest</i>

<i>plants as they have much medicinal value untapped yet.</i>
<i>We need wildlife as much as they need us. I.E for aid of things.</i>
<i>We rely on bees to pollinate blossom and then we get our fruit like apples.</i>
<i>Well take us being an economic society, diversity in carbon emissions affects the food chain.</i>
<i>When you chop trees down you spoil the balance and nothing works correctly.</i>
<i>wild plants give food for insects, nectar etc. and we need plantations to propagate these plants, where they can grow freely.</i>
<i>Wildlife and insects are the start of our food chain.</i>
<i>You need them. They are good for the environment. You need them for greenery and to give out oxygen.</i>

Visual and Social Benefits

<i>A better state of living and more of the countryside to enjoy.</i>
<i>A lot on the moors, a lot of planting.</i>
<i>Aesthetic value.</i>
<i>All have their little way of making the countryside better.</i>
<i>Animals being helped by building special areas for them.</i>
<i>Animals entertain people. Plants are nice to look at.</i>
<i>Because [you] get the pleasure of birds, trees, plants. Nice to see cowslips. All kinds of things.</i>
<i>Because it's nice to have things to see.</i>
<i>Because there are just buildings everywhere.</i>
<i>Better to have things around rather than lose them.</i>
<i>Birds, things in your garden.</i>
<i>By the animals, to see them.</i>
<i>e.g. Horses providing manure.</i>
<i>Encourage people to come out into the UK countryside and enjoy it.</i>
<i>Encourages more wildlife and plants.</i>
<i>Encourages you to go out and see nature</i>
<i>Enjoyment for people; de-stress people.</i>
<i>Enjoyment of seeing the countryside.</i>
<i>Everyone likes to see animals, we don't like to see the countryside with little patches of land sold off for housing. These patches have lots of wildlife which is so important.</i>
<i>For leisure - it would change countryside if we didn't have it.</i>
<i>Gives people something to do and visit.</i>
<i>Gives us open spaces for walking</i>
<i>Gives us somewhere to relax.</i>
<i>Gives us things to see, if we didn't have them it wouldn't be much use.</i>
<i>Gives variety and more greenery is better then houses being built everywhere.</i>
<i>Gives you places to go and things to look at.</i>
<i>Gives you something to look at, nice to see plants and birds.</i>
<i>Going looking at the country, out camping, see the animals and plants.</i>
<i>Green areas to visit for pleasure and health. Both mentally and physically.</i>
<i>Have better things to look at instead of buildings and stuff.</i>
<i>Having lots of greenery around us.</i>
<i>Healthier environment and better recreational activities.</i>
<i>I don't know apart from that it is nice to have nature and countryside around, to have fresh air and go for walks.</i>

<i>I get to see things that I wouldn't normally see.</i>
<i>I think plant life in woodland is an attractive thing, to have different types of birds or river species or woodland animals, makes more interesting places to live.</i>
<i>I walk a lot through the country nature reserves. It's good for people to visit and watch.</i>
<i>I would just like to see lots more birds in the garden to feed.</i>
<i>If it's animals, it's very pleasant to see wildlife.</i>
<i>If nature thrives people are happier.</i>
<i>If we lost all the plants and animals it would be a bare place.</i>
<i>If you lose plants, what's left?</i>
<i>I'm a keen gardener. The more plants that are available and animals, I would welcome that.</i>
<i>In the Amazon, all the plant species are being lost, also just enjoyment of our local environment would be lost if they were destroyed.</i>
<i>Interesting for young children - nature walks and pond life</i>
<i>It brings people into the community.</i>
<i>It brings people to visit areas of interest for wildlife etc.</i>
<i>It definitely makes a difference to people's attitude to life. It makes people happier and more interested in nature.</i>
<i>It does not seem to affect us in any way, we still have wildlife and natural beauty around us here.</i>
<i>It encourages plants and wildlife.</i>
<i>It enriches our lives. We can enjoy the natural beauty of the countryside.</i>
<i>It gives a better environment for our children.</i>
<i>It gives things to look at especially birds and animals.</i>
<i>It gives us a better environment.</i>
<i>It gives us a place to go to walk and not be surrounded by concrete.</i>
<i>It gives us balance and places to relax.</i>
<i>It gives you places to relax</i>
<i>It gives you something to do. Pleasanter places to walk and see things.</i>
<i>It helps make us all healthier and gives better quality of life.</i>
<i>It increases the quality of life, for stress and mental health.</i>
<i>It is nice to look at some variety.</i>
<i>It is nice to see wildlife in the land near where I live.</i>
<i>It makes it more pleasant and enjoyable.</i>
<i>It makes life more enjoyable, being able to enjoy animals and the countryside.</i>
<i>It makes life worth living when one sees wildlife about.</i>
<i>It makes our surroundings look better having greenbelts, we don't want just houses.</i>
<i>It makes our woodland walks more enjoyable with the preservation of plants and wildlife.</i>
<i>It makes people friendlier when there are plants and animals to watch and comment on.</i>
<i>It makes the place better, greener.</i>
<i>It makes the place more attractive and healthier place to live</i>
<i>It makes the world a better place to live.</i>
<i>It makes things look nice and pleasant.</i>
<i>It means we don't lose our forests and wildlife.</i>
<i>It promotes tourism to the area and a healthier lifestyle by encouraging us to visit woodland areas.</i>
<i>It would add to people visiting the area</i>
<i>It wouldn't be normal - it's what you see.</i>
<i>It's a nicer environment for the kids; it encourages their interest in wildlife.</i>
<i>It's an indicator of a healthy environment.</i>
<i>It's better if you see more plants and animals</i>

<i>It's good to see a mix of wildlife</i>
<i>It's lovely to see the beautiful countryside.</i>
<i>It's more pleasurable than practical.</i>
<i>It's natural, it's nature and it shouldn't be spoilt.</i>
<i>It's nice to go to open spaces to see the wildlife in their surroundings.</i>
<i>It's nice to relax and take the children out so they get fresh air</i>
<i>It's nice to see different animals about.</i>
<i>It's nice to see the birds around.</i>
<i>It's saving our areas of natural beauty.</i>
<i>It's the environment it benefits; stops the wildlife from disappearing.</i>
<i>Just hard to imagine what it would be like with no flowers, trees or animals.</i>
<i>Just nature in general - if you appreciate nature, it gives you satisfaction.</i>
<i>Just to keep the countryside alive.</i>
<i>Leisure interests, nice walks, good for children to learn about nature.</i>
<i>Like choice, a change is as good as a rest. Gladdening the eye, is good.</i>
<i>Like to see birds and wildlife in the garden and like to live in a natural environment.</i>
<i>Like to see more wildlife around.</i>
<i>Look at the wildlife, beauty to the world, for example blue tits, frogs.</i>
<i>Looking at the parks, the improvements for plants and animals.</i>
<i>Maintain surrounding land, balance nature.</i>
<i>Makes for a better living environment.</i>
<i>Makes it more attractive.</i>
<i>Makes our lives healthier and enriches our lives too. We love to walk in the Dales etc., we go walking once a month. What a boring world without nature.</i>
<i>Makes the area look better.</i>
<i>More benefit because of all the nature areas that I take my children to, as a family we love nature and go out into the countryside regularly. And we benefit because this keeps us healthy.</i>
<i>More food from it for a happy life.</i>
<i>More green areas with plants.</i>
<i>More leisure in the countryside.</i>
<i>More parks for children and wildlife parks.</i>
<i>More species and more choice.</i>
<i>Mowbray Park renovations has nice plants - brings in more wildlife.</i>
<i>Natural beauty helps people to relax.</i>
<i>Nature and wildlife make people happier and it's healthy to walk in the countryside.</i>
<i>Need some animals around especially things like red squirrels which we are losing.</i>
<i>Nice to hear / nice to look at birds / makes it a nicer place to live</i>
<i>Nice to see nature/fresh air - after all, the planet belongs to animals and plants, just as much to us.</i>
<i>Nice to see wild plants and animals and have open spaces.</i>
<i>No it's just relaxing to watch and walk amongst.</i>
<i>Open spaces to walk in and clean air to breath.</i>
<i>People can see the different animals and plants</i>
<i>People enjoy the countryside. They like to visit the countryside, see the woodlands, lakes and rivers.</i>
<i>People like to escape the urban areas and escape to the countryside for fresh clean air, for day trips. Just look at spring watch such a popular program.</i>
<i>Places to go.</i>
<i>Plant and animal life is nice to see but I don't think they benefit society.</i>
<i>Plants and animals and being able to go to the countryside makes you happier.</i>

<i>Plants make the place look nice.</i>
<i>Plants make the place look nice.</i>
<i>Pollination of plants through birds and bees which attracts tourism.</i>
<i>Psychological well being of the people.</i>
<i>Really nice outdoors and more nature areas.</i>
<i>Satisfaction and happiness brought to humans by wildlife.</i>
<i>Slight smell in the countryside is beautiful. It is good for people to get out away from the towns.</i>
<i>Something better to look at rather than rubbish in the street.</i>
<i>The animals - I like them and they have improved. I pay towards an animal charity.</i>
<i>The more variety we have to choose from makes our lives better.</i>
<i>The nature reserves are nice. It is nice to see the birds and squirrels.</i>
<i>The wildlife makes the environment better.</i>
<i>The world would be a lesser place to live in.</i>
<i>Therapy - for humans' mentality.</i>
<i>There would be less wildlife.</i>
<i>There would be no where to go if we lost all greenbelt areas.</i>
<i>They bring happiness and trees protect the air.</i>
<i>Tourism depends on biodiversity to survive.</i>
<i>Visual and social benefits.</i>
<i>We get so much pleasure from the animals, insects etc. in the environment.</i>
<i>We need green areas for kids to play in.</i>
<i>We need open spaces for tourists to come.</i>
<i>We need plants and living things or they will all die out and we'll never see them again.</i>
<i>We need them because if they become extinct it won't be the same as you can see now with a shortage of birds around.</i>
<i>We need them so that we have places we can relax.</i>
<i>We need this countryside and everything. Its healthy and people like to visit it. It does us good.</i>
<i>Well it is always a pleasure to see animals and plants.</i>
<i>Well it's good to have animals, plants and natural places.</i>
<i>When we have spare time we need to have somewhere to go.</i>
<i>Would be a boring place if there were no place to see birds or go for walks.</i>
<i>Would be nice to have clean preserved wildlife areas, these can encourage to go out and gather wild fruits.</i>
<i>You need animals and plants - more pleasant life for us all if we have living things around us</i>

Education

<i>Children know being clean and tidy in nature preserves future wildlife. Polluted areas do not thrive.</i>
<i>Children need to be educated to see these things themselves, to learn to support them.</i>
<i>Children's education. Showing them ponds and wildflowers.</i>
<i>Doesn't benefit our children - they need parklands and beaches and animals</i>
<i>Educating children to appreciate wildlife</i>
<i>Education around nature makes people responsible for their actions. People join together form a lobbying group and unite together.</i>
<i>Education. If you lose some of the food webs, we lose out, ie. humans.</i>
<i>Encourage kids to do it, if you give them help and show them.</i>
<i>For children, so they know about animals and plants</i>

<i>For educational purposes - mankind cannot survive.</i>
<i>Helps to make children see the nature in things.</i>
<i>It encourages children to learn about wildlife.</i>
<i>It improves the environment for the young. It teaches them respect, not to take what is around them for granted.</i>
<i>It is good for children to learn about the natural environment around them.</i>
<i>It is only a recreational thing. Doesn't affect working lives. Only useful for children's education.</i>
<i>It teaches youngsters how things grow.</i>
<i>It's educating children to understand plants and animals.</i>
<i>It's good for children to learn about nature.</i>
<i>It's nice to know there are other species and be aware of it.</i>
<i>Learning about nature is so interesting, places of interest for days out. So important for the planet to sustain the balance of all creatures. And oxygen is needed from trees.</i>
<i>Learning purposes for kids for like all the animals and plants there would be less food</i>
<i>Makes up more awareness of what is happening in our area</i>
<i>Making people's awareness to the natural world. Everything has a cost. People benefit from nature, they enjoy it.</i>
<i>More places to visit and educate kids about nature.</i>
<i>Need trees. The children need to know about the animals.</i>
<i>Not so many landfills. Biodegradable things used to prevent so much waste. There is better opportunity for children to learn about nature.</i>
<i>School children learn about nature and life.</i>
<i>Somewhere for the kids to see and learn.</i>
<i>Teach children about plants and wildlife from lifecycles that relates to nature and how it affects our lives. Helps keep alive things that are endangered and things like butterflies and ladybirds which you don't see so much now.</i>
<i>Teaches people about how we all interact</i>
<i>Teaching children about nature.</i>
<i>Teaching kids the importance of nature at school.</i>
<i>The plant life educates the young.</i>
<i>The youth of today should know about plants and animals.</i>
<i>We learn about how things survive and grow.</i>
<i>We need plants and animals to teach children about life.</i>

Research/Medicine

<i>Certain plants help e.g. with healing. Natural medication. Some plants help us to life off the oxygen.</i>
<i>Diversity allows a gene pool available to humanity for future use, for example against diseases.</i>
<i>Find new drugs</i>
<i>Finding species of plants to help in research into drugs.</i>
<i>For researching plant life for decoration or medicine.</i>
<i>Gene pool is important.</i>
<i>If you lose trees and plants you are limiting stock of plants for medicines and research which makes us more resistant to disease through limited resources.</i>
<i>Increases the gene pool available to fight diseases etc.</i>
<i>It eliminates insects and problem crops. We need crops for medicines.</i>
<i>It helps keep places clean and free from disease.</i>
<i>Keep species alive that could be used for medical purposes in the future.</i>

<i>Keeps diverse gene pool available.</i>
<i>Keeps species alive which could be useful in the future.</i>
<i>Keeps us immune to things.</i>
<i>Lots of herbal remedies are discovered from plants.</i>
<i>Lots of medicines are discovered in plants and they experiment on animals.</i>
<i>Medicines from plants, carbon dioxide from trees and plants, sharing our environment with animals.</i>
<i>Plants help with medicines, discover new cures.</i>
<i>Research in different types of animals and things for us</i>
<i>The loss of any plant life you don't know what potential they have as medicines. For the quality of life. For the benefit of future generations - they might find further use for that.</i>
<i>To give research into new medicines.</i>
<i>You can get drugs made out of plants.</i>

Other

<i>A lot of people are not concerned with it.</i>
<i>A place for animals to go and for plants to grow.</i>
<i>Adds to our quality of life.</i>
<i>Any little thing has to help.</i>
<i>Back to nature basically, makes people think about the environment.</i>
<i>Basically, we are trying not to lose many animals; give them more places to live.</i>
<i>Because I think the quality of the environment is the response of people in general.</i>
<i>Because if it goes and we lose it, we can't use it again such things as fox gloves cant use them now.</i>
<i>Because it keeps our planet health. Because it makes us more aware of damage that we are causing to it.</i>
<i>Because of plants.</i>
<i>Because of the plant life.</i>
<i>Because we only need a set amount for what we use, pine trees for desks, cows and sheep for food.</i>
<i>Better environment for the society. Less pollution. Better for children - our future children.</i>
<i>Biodegrading rubbish.</i>
<i>Biodegrading.</i>
<i>Biodegrading.</i>
<i>Biodegrading.</i>
<i>Breaking down carbon etc.</i>
<i>Bring people more, income increases.</i>
<i>By breaking down rubbish on landfill sites.</i>
<i>By breaking down rubbish.</i>
<i>By breaking down rubbish.</i>
<i>Can't put it in words.</i>
<i>Carbon sequestration is assisting in reducing global warming, medicinal value, and sustainable fuel sources to promote sustainability, arienity value, to return a balanced symbolic approach to living and a healthy lifestyle.</i>
<i>Cleaner air, help animals.</i>
<i>Countryside is important to everyone.</i>
<i>Creates a better environment.</i>
<i>Decent drivers for recycling. They need to return to boxes to the place where they collected</i>

<i>from. They could do more to help the environment. Recycle more.</i>
<i>Don't know - to the environment as a whole.</i>
<i>Don't know how it can actually benefit society unless its relevant to work.</i>
<i>Don't know what it means, could be preservation.</i>
<i>Don't know why... a more environmentally way of living?</i>
<i>Don't see any comeback. We do this, do that, but there are not any results.</i>
<i>Everybody loves nature. It's lovely to look at the environmental issues.</i>
<i>Everything is there for a reason.</i>
<i>For medical research.</i>
<i>For the teaching of the younger generation.</i>
<i>Grey squirrel done away with</i>
<i>Has to be seen to be improving things.</i>
<i>Have to feed them. Nice to see how they come on.</i>
<i>Having more animals and birds around is better then not having them.</i>
<i>Hedges should come back again.</i>
<i>Help farming and help prevent loss is some special plants and birds and insects.</i>
<i>Help improves. It's a nice thing for us to be doing.</i>
<i>Help with climate change</i>
<i>Helping to plant trees etc. Better for the environment.</i>
<i>Hopefully it will teach kids to respect wildlife and look to the future.</i>
<i>I disagree with what politicians have to say. Public have no say. They do what they want.</i>
<i>Can't believe what they say about green issues. They are all liars.</i>
<i>I don't think you should ignore what is happening.</i>
<i>I just don't think it does.</i>
<i>I like them.</i>
<i>I think it probably benefits the agricultural economy.</i>
<i>I think it's mainly rainforests</i>
<i>If everybody participated, it would help.</i>
<i>If it protects things from dying out it can only be useful.</i>
<i>If it stops the loss then it can only be good.</i>
<i>If it stops things from dying out then it has to benefit us.</i>
<i>If people loose their spiritual connection with nature, a lot of things go subsequently wrong in their lives.</i>
<i>If they aren't increasing. But we eat this and that, stocks will eventually run out.</i>
<i>If they die out there will be nothing left, so we have to better to keep animals and plants living.</i>
<i>If we could keep things the same all the time it would benefit us.</i>
<i>If we got rid of all the wildlife we would be in a tramble, the trees for instance.</i>
<i>If we plant more trees it equals things out, so we don't deplete the environment.</i>
<i>If we tear down forests its bad for the environment.</i>
<i>If you can protect wildlife and plants, you don't want to lose them.</i>
<i>I'm only interested in myself and I am not bothered about anything else at my age, at 88.</i>
<i>In all cases, in towns and cities, we should try and help.</i>
<i>It contributes to our general well-being.</i>
<i>It gives a variety of animals and plants.</i>
<i>It gives alternatives to sustain the environment (ever decreasing)</i>
<i>It has to, or it wouldn't be an issue.</i>
<i>It helps have a better life</i>
<i>It helps make our lives better</i>
<i>It helps nature.</i>

<i>It helps protect existing animals and plants.</i>
<i>It keeps everything alive, not all things are man made.</i>
<i>It keeps everything ticking over.</i>
<i>It makes everyone happy and makes life more enjoyable.</i>
<i>It makes life better</i>
<i>It makes life better.</i>
<i>It makes the countryside a better place to live</i>
<i>It provides interaction with nature.</i>
<i>It wouldn't be good if we didn't have the animals and plants around.</i>
<i>It's a better world to live in.</i>
<i>It's a shame if we lose species of animals.</i>
<i>It's better for the economy.</i>
<i>It's got to - people are involved, they have jobs e.g. Washington Wildfowl Park.</i>
<i>It's green save the planet, why kill animals to build houses?</i>
<i>It's important</i>
<i>It's important we look after environment</i>
<i>It's just nature - it takes its own course.</i>
<i>It's only wildlife and I don't think it would matter on a practical level.</i>
<i>It's part of life - all parts of God's creation, provided by God for us to enjoy.</i>
<i>Just a national thing I suppose.</i>
<i>Just a natural thing and I can't think of anything else now.</i>
<i>Just enjoying but stop house building going on.</i>
<i>Just off set, global warming.</i>
<i>Keep things alive and things kept to what they used to be years ago.</i>
<i>Keeping golf course and natural river areas free of development.</i>
<i>Keeping plant and animal life.</i>
<i>Keeping the wildlife.</i>
<i>Leave them in their natural state. The hedges and tress should be left as they are.</i>
<i>Less carbon emissions</i>
<i>Less pollution.</i>
<i>Loss of species i.e. plants.</i>
<i>Make us happier</i>
<i>Makes it a better place.</i>
<i>More species are being helped.</i>
<i>More sustainable developments needed.</i>
<i>More sustainable. The world will last longer.</i>
<i>More tree planting.</i>
<i>Must do it, if it saves plants and animals.</i>
<i>Nature is good for peoples' soul.</i>
<i>Nature looks after itself.</i>
<i>Need to know more about biodiversity</i>
<i>Need to use whatever you are recycling to more beneficial purposes.</i>
<i>No. I just don't think it does.</i>
<i>Not enough is being done, it doesn't make any difference.</i>
<i>Only weather does affect everything - does not affect everybody.</i>
<i>People have to diverse on the account of the environment.</i>
<i>People should think twice before they waste stuff.</i>
<i>People want to help.</i>

<i>Plants and birds would go.</i>
<i>Plants need to be pollinated by farmers.</i>
<i>Plants, pollen, bees and butterflies.</i>
<i>Polluting insects, hedgehogs and more pests.</i>
<i>Put rubbish to good use.</i>
<i>Quality of life and quality of environment is a measure of how us as humans, as to how we treat the animals and plants. More care should be taken into protecting what we have left.</i>
<i>Quality of life for mankind, life would be boring with out variety and range of animals and plants. Part of life's rich tapestry.</i>
<i>Quality of life.</i>
<i>Recycling might help the rubbish off the countryside and out of the ponds.</i>
<i>Recycling no more rubbish.</i>
<i>Replanting trees when one is cut down. Putting new plants around all the time.</i>
<i>Save the planet a bit if we all do our bit.</i>
<i>Saves Fossil fuels.</i>
<i>Saves the environment.</i>
<i>Should save plants and animals</i>
<i>Sounds like a preservation thing.</i>
<i>Taking back some of the land that has been used for industry in the past and returning it back into wildlife.</i>
<i>The amount of animals we are losing is not very good.</i>
<i>The council made Brassids pond an area of wildlife interest.</i>
<i>The green house gases and all that, it increases global warming.</i>
<i>The kids growing up now need to see what is being lost and see what they are missing.</i>
<i>The more you have the more choice you have to concern and offer all associated.</i>
<i>The pride of humans - we are dominant. We have no right to say what should be extinct.</i>
<i>The trees and the rainforests help stop global warming.</i>
<i>The world would be a worse place without plants and animals.</i>
<i>Their all here for a reason.</i>
<i>There are going to be some species that are going to do better than others.</i>
<i>There are more people conscious of it these days so will do more to help.</i>
<i>There are things that we haven't discovered yet, we need to provide a natural balance.</i>
<i>There is a reason for everything, balance of nature.</i>
<i>They encourage wild birds.</i>
<i>They were put here for a reason so must be needed.</i>
<i>Things die off for a reason - stop overcrowding.</i>
<i>To prevent loss of species and plants.</i>
<i>To save lives of disappearing animals.</i>
<i>To save plants and animals from becoming extinct.</i>
<i>To stop red squirrels becoming extinct.</i>
<i>Trying to do something, but not letting people know.</i>
<i>Waste products cleaned up; natural environments brought back.</i>
<i>We are all healthier for it.</i>
<i>We can only benefit by things all around us.</i>
<i>We don't need all the plants and animals to survive.</i>
<i>We have less chance of losing wildlife and plants.</i>
<i>We must keep diversity going, we never know when we might need to use it in the future.</i>
<i>We need a variety</i>
<i>We need it to live a healthier life.</i>

<i>We need plant life, we need animals, we need both. They deserve a life</i>
<i>We need plants and animals to live.</i>
<i>We need the countryside and plants for healthy living. Animals have a right to the countryside more than people who live in the towns.</i>
<i>We need to protect the environment for the future generations.</i>
<i>We need wildlife.</i>
<i>We should do our best to look after the planet.</i>
<i>We should look after our world</i>
<i>We should not mess about with nature, we shouldn't build on flood plains, it will come back to haunt us.</i>
<i>We should protect our environment.</i>
<i>We will all benefit if we help with biodiversity in our country.</i>
<i>We would have more wild living in the area.</i>
<i>Well I like to see things that are different.</i>
<i>Well it's for the children, the next generation.</i>
<i>Well, we need trees planted. Where are animals, such as the Polar Bear in Iceland where the ice is melting, going to go? It has to do with industry.</i>
<i>Would like to see more plants and wildlife but it is not going to happen - there are too many buildings.</i>
<i>Wouldn't be the same without animals and plants. This is helping a little.</i>
<i>You need to live with them.</i>
<i>You should keep as many plants and animals as you should.</i>
<i>You're preserving for the next generation.</i>
<i>You've got to have different animals - wild or pets.</i>

1.5 Can you name up to three natural assets, that are important to you in the area where you live? (Q11)

Newcastle	Alnwick Gardens.	It's fabulous for a day out.
Newcastle	Alnwick Gardens.	Day out.
Newcastle	Beamish Open Air Musuem.	For a day out.
Newcastle	Blair Drummond	Visit every year whilst on holiday.
Newcastle	Hexham castle and cathedral	Day trip
Newcastle	Seahouses and Bamburgh Castle	Group trip with tenants from sheltered accommodation.
Newcastle	Alnwick Moors	Day out.
Newcastle	Amble Countryside.	On holiday.

Newcastle	Kielder Forest	Day out with the children.
Newcastle	Kielder Forest	For a day out.
Newcastle	Kielder Forest	For a day out.
Newcastle	Kielder Forest.	A day out.
Newcastle	Kielder Forest.	A short break.
Newcastle	Kielder Forest.	Camping Trip.
Newcastle	Pennines	Taking a break whilst travelling to the North West.
Newcastle	Plessey Woods	For a day out with the children
Newcastle	Plessey woods	Day out.
Newcastle	Robinhood Forest/Kielder Water	Day visit
Newcastle	Stockton Park/Countryside	Day trip.
Newcastle	Alwinton	For a day out.
Newcastle	Gunnerton Tyne Valley.	For a day out.
Newcastle	Newbiggin by the Sea	Day out.
Newcastle	Newbiggin by the sea.	Day out.
Newcastle	Pitlochry Logietrait Perthshire.	For a holiday.
Newcastle	Whitley Bay	Day visit with kids and fish and chips
Newcastle	Whitley Bay	Day out.
Newcastle	Greece	Holiday
Newcastle	Kielder Forest	Visiting
Newcastle	Great Yarmouth	Staying with father.
Newcastle	Morpeth	To see family and go to the park.
Newcastle	Skelton Estate.	To visit family.
Newcastle	Exhibition Park.	To take cousins to see the lake.
Newcastle	Exhibition Park.	To see the musuem.
Newcastle	Gosforth Park	For a look around - new flowers have been planted.
Newcastle	Jesmond Dene	To see Pet's Corner
Newcastle	Saltwell Park	It gives me pleasure to see the swans

Newcastle	Saltwell Park	To see the animals
Newcastle	Saltwell Park	It's big - there's lots to look at and it's peaceful.
Newcastle	Saltwell Park	It's got animals and lots of flowers in.
Newcastle	Hirst Park.	Passed through it on the way to family home.
Newcastle	Kenton Park.	I cut through to go to the bus stop.
Newcastle	Leazes Park	Walk through/short cut
Newcastle	Leazes Park.	I cut through to go elsewhere.
Newcastle	Nunsmoor Park.	Passed through it on my way to my brothers house.
Newcastle	St John's Bridlepath	I was passing by.
Newcastle	The Queen Alexandra Park	Short cut to somewhere else.
Sunderland	Back House Park	Walked on my way to town - I enjoy the trees and landscape.
Sunderland	Backhouse Park	For a walk.
Sunderland	Barnes Park	Dog-walking
Sunderland	Barnes Park	For a walk.
Sunderland	Barnes Park	For a walk.
Sunderland	Barnes Park	Dog-walking
Sunderland	Barnes Park	Walking, lake, birds
Sunderland	Barnes Park	Walk
Sunderland	Barnes Park	Dog walking
Sunderland	Barnes Park	For a walk.
Sunderland	Herrington Park	Walk the dog, peaceful and nice place to be.
Sunderland	Herrington Park	Walk
Sunderland	Local green area	Dog-walking
Sunderland	Mowbary Park	Like to walk through it.

<i>Sunderland</i>	<i>Tunstall Hills</i>	<i>Take dogs for a walk.</i>

1.8 Which organisation(s) are you currently a member of? If other, please state: (Q17a)

<i>Born Free.</i>
<i>Civic Society</i>
<i>Dogs Trust</i>
<i>Dogs Trust.</i>
<i>English Heritage.</i>
<i>English Heritage.</i>
<i>Fair Trade.</i>
<i>IFAW</i>
<i>Mountain Gorilla conservation in Rwanda.</i>
<i>Ramblers</i>
<i>Ramblers Association</i>
<i>RSPCA</i>
<i>Scottish Wildlife Trust.</i>
<i>Sierra Club (USA)</i>
<i>Whale and Dolphin Conservation</i>

1.9 Which organisation(s) have you volunteered with in the last year? If other, please state: (Q19a)

<i>Church outings</i>
<i>Corus fishing club</i>
<i>Friends of Stewart Park Middlesbrough.</i>
<i>Green Festival</i>
<i>Help old people in Freeman Hospital</i>
<i>Local care home</i>
<i>PDSA</i>
<i>R. N. for Blind</i>
<i>Red Cross</i>
<i>RSPCA</i>
<i>Salvation Army charity shop</i>
<i>Sure Start</i>

1.10 Would you like to make any further comments about biodiversity or related issues, in particular relating to the North East region?

More action needed

<i>A lot more could be done to protect what we have in nature than having designated areas for wildlife that people don't go back to visit.</i>
<i>Basically many local authorities, taken measures, supermarkets the same. For planning permission, they say you let us build and we'll donate so much to such and such.</i>
<i>Building on green belts, fields or open spaces needs to stop.</i>
<i>By planting more crops we can undo the damage to the soil.</i>
<i>Clean up the beach</i>
<i>Clean up the rubbish and educate young people from school not to throw away litter.</i>
<i>Cleaning up the beaches - they are dirty and need attention.</i>
<i>Could do more for the wildlife in the North East - stop building and taking away animal and plant species.</i>
<i>Council should do more for recycling, less land fill so less pollution and land loss.</i>
<i>Councils should give priority to green field sites, not to develop as housing. First, brownfield areas should be used instead, like Albert Hill</i>
<i>Everybody should do something to help. Need animals.</i>
<i>Everyone should be encouraged to do their bit. Recycle more. Less Litter. Less food waste in their bins - become vegetarian - that would do a great deal for the planet. Get rid of McDonalds!</i>
<i>Everyone should do more to save the wildlife.</i>
<i>Everyone should do something to help to preserve and encourage wildlife, nature's animals, birds and pond life. Use more biodegradable things and stop dropping litter and fly tipping.</i>
<i>Everyone should do their bit so it wouldn't have such an impact.</i>
<i>Get rid of seagulls and pigeons - they're vermin.</i>
<i>Get the council to clean up Hylton Castle Dene and stop trees being set on fire.</i>
<i>Have more parks in this area - more animals for the kids.</i>
<i>I am sure that it is important but I don't hear anything locally or regionally that our local government is doing anything different or particularly better than other local councils. And I think it should be doing more to help the environment.</i>
<i>I believe that all the spare green spaces in Middlesbrough, should be managed to encourage wildlife and people. I don't think that the council does enough with the money that they take off us.</i>
<i>I don't like the way the hedgerows are disappearing especially in towns, more consultation with local residents before greenery is removed.</i>
<i>I think if we all pull together and take your rubbish home.</i>
<i>I would like to see more solar panels on housing roofs. I would like to see more schools following in the footsteps of Cassop School, but Cassop school to be in the forefront, it makes us special. Cassop school continues to seek more ways to help the environment.</i>
<i>I'd like to see more green belts, more nature.</i>
<i>I'm not sure that we are doing enough about global warming.</i>
<i>It would be helpful to us all to stop destroying everything - trees, flowers. Keep things as they are.</i>
<i>It's important - there could be more done to help increase it.</i>
<i>Just important to everybody. Make sure things don't get worse and improve what we have now.</i>

<i>Keep planting more trees in the area.</i>
<i>Keep rivers and lakes unpolluted so people like me can enjoy them.</i>
<i>Keep the National Parks as parks.</i>
<i>Keep the place nice and tidy, more natural fields, let the meadows come back and let the hedges come back.</i>
<i>Keep the rivers clean, too many plans for land erosion.</i>
<i>Like to see creatures that are lost put back into the area.</i>
<i>Look after the nature reserves that we have in the north east region. These are so important to us all.</i>
<i>Make more natural wildlife areas know.</i>
<i>More changes need to be put into place. More people need to be more conscious about carbon dioxide emissions.</i>
<i>More control on genetic modification.</i>
<i>More done/ more plants and colours.</i>
<i>More effort going in to alternative energy sources.</i>
<i>More litter bins in the town centre. Convert old buildings rather than use green land.</i>
<i>More parks around the North East and more bike tracks, less houses.</i>
<i>More people should get involved.</i>
<i>More planting of trees to compensate for new housing estates.</i>
<i>More recycling facilities</i>
<i>More resources should be made available to the council. Local business's should get involved as well and put some money in.</i>
<i>Need more parks for people to get to, for example, more information on open nature reserves.</i>
<i>Need to stop building on green sites. Build and give more wildlife corridors.</i>
<i>No we should go out and about more and see what is going on, but the weather has not been that good this year.</i>
<i>Not taken seriously enough. Something must be done by the government.</i>
<i>People paving over the land for their gardens, it should be stopped. The council should check Acklam Road. Most gardens are car parks and it should be stopped.</i>
<i>Preserve more natural things. Take derelict buildings for new housing, don't take new land.</i>
<i>Protect what we've got</i>
<i>Re-cycling is encouraged more green bins and less landfills.</i>
<i>Reserve given belts so they can't build everywhere, keep coasts clean and tell people about these things.</i>
<i>Same more rural areas and protect wildlife.</i>
<i>Save the countryside - the council should do more.</i>
<i>See more improvements, councils helping more.</i>
<i>See more resources put into the area and make use of it. Make people more aware of what they can do, they have to be hand fed.</i>
<i>Should be more money pumped into making people decent so our children can enjoy it.</i>
<i>Should encourage more wildlife and plants.</i>
<i>Something needs to be done as there is concreting everywhere.</i>
<i>Stop all the new builds.</i>
<i>Stop building houses on any spare bit of land. Build more little local parks for kids and educate kids on nature's animals.</i>
<i>Stop building on green belt land</i>
<i>Stop building on green belt land. Give trees and animals a chance to survive.</i>
<i>Stop concreting over everything, so they can use the land for something else.</i>
<i>Stop concreting over gardens and stop building on green sites.</i>
<i>Stop the building on any private farmland or green areas.</i>

<i>Stop the flats.</i>
<i>Stop using the golf courses and green land areas for homes and commercial property development.</i>
<i>Take care to clean up outside and too much housing given careers.</i>
<i>The council has to do a hell of a lot more.</i>
<i>The council should keep up the good work in the areas I mentioned previously.</i>
<i>The government should put money into it to help the local councils.</i>
<i>The government should spend more money in the North East, more on the countryside protecting what we have left before it gets lost. Too much money is wasted elsewhere.</i>
<i>The litter effect on animals. Too much litter lying around causes problems.</i>
<i>The North East isn't doing enough to prevent the loss of biodiversity.</i>
<i>The whole of the N.E. and U.K. need to put things into place to be able to re-introduce species which were here previously.</i>
<i>There is still much more people could do, more effort to be healthy, not eating ready meals.</i>
<i>They seem to be trying to make improvements, but more should be done.</i>
<i>Tidy up the litter in the area and look after the plants more to keep wildlife alive.</i>
<i>To stop destroying the naturalness of the open spaces and to make more parks in the towns.</i>
<i>Too much land used for buildings.</i>
<i>Too much new building going on.</i>
<i>Too much urban regeneration. make more space and accommodate both green areas (to balance the issue) and urban.</i>
<i>Unless we protect the North East there'll be nothing for future generations. They are building on green belts. We could do more.</i>
<i>We could all do a bit more on reflection.</i>
<i>We just need to look after the open spaces and natural beauty or we'll lose it.</i>
<i>We should be doing more to reintroduce things like hedgehogs, deer and more wildlife into the area.</i>
<i>We should protect green belt and develop brown field sites instead.</i>
<i>Would like government and council to do more things to encourage people to be involved more</i>

More education/information needed

<i>Advertise ways in which we can help and explain what it means exactly.</i>
<i>As a whole, we could do more, but we need to be told more about what it entails.</i>
<i>Awareness needs to be raised on what is going on in the region.</i>
<i>Awareness of these areas and things they can do to help and preserve them. Global awareness, global warming and energy efficiency.</i>
<i>Bio diversity should be taught in schools from an early age. So children can have the understanding of the importance of their relationship with natural environment.</i>
<i>Biodiversity is not very well promoted.</i>
<i>Children should be encouraged more to think about what's happening</i>
<i>Children should be more aware of wildlife and how it lives.</i>
<i>Continue the good work. Educate the people.</i>
<i>Do use to promote it and don't think many people will know what it is.</i>
<i>Don't know anything about it.</i>
<i>Don't know anything about it.</i>
<i>Don't know anything about it.</i>
<i>Don't know enough about it.</i>
<i>Don't know if we understood what it is we need to know.</i>

<i>Don't know what it means.</i>
<i>Encourage it.</i>
<i>I haven't got enough information about it.</i>
<i>I would like to know more about what it means.</i>
<i>It should be made more aware.</i>
<i>It should be more widely known and people informed, so more effort put into making people understand.</i>
<i>It's important to make awareness to people by doing surveys like this</i>
<i>Just encourage children to visit more nature reserves and take them there.</i>
<i>Just tell us about it.</i>
<i>Keep people informed, if they know they can do something about it.</i>
<i>Like to be able to find more information about it.</i>
<i>Make us more aware, tell us how to help and where these places are.</i>
<i>More done and more information about what's happening.</i>
<i>More education in it , as people don't understand so don't care.</i>
<i>More of this kind of survey and awareness and keep people informed and aware of the interfering with wildlife and encouraging vigilance in country areas.</i>
<i>More public knowledge is needed about it.</i>
<i>Need to see more action off the telly than on it. More people need to get involved, especially with the kids.</i>
<i>Needs better education about it.</i>
<i>Never heard about biodiversity until today - need more information via local papers/news</i>
<i>No just let us know about it.</i>
<i>People are aware of it, those responsible and are doing something to enhance it I guess.</i>
<i>People need to know how they can prevent more loss of green areas and how to help encourage wild birds.</i>
<i>People should be made more aware</i>
<i>Should be promoted better as I don't really hear anything about it.</i>
<i>Should get a high profile and encourage the kids are school to learn.</i>
<i>Tell kids more in schools</i>
<i>The town centre could do with promoting itself better.</i>
<i>There should be more done to make people more aware of things.</i>
<i>There should be more information for people.</i>
<i>There should be more of it - make people more aware.</i>
<i>We are doing the damage by too much housing and given belts, there should be more preservation of pond life, insects and butterflies. Make people more aware.</i>
<i>We need people like you to bring it to our attention, what's going on, because it's for the better.</i>
<i>We need to know a bit more about it on the news or in the local paper to get to know all about it.</i>
<i>We should all try to change in the North East and introduce education to children in schools about it to make them more aware.</i>
<i>You don't hear much about it, so maybe there needs to be more education in schools.</i>

Other

<i>A park by the castle & river with things for bairns to do</i>
<i>All beyond Redemption, too late we can not turn back the clock but we could slow the damage down. We need better public transport system, subsidised so fares are cheap. This would be a giant step into getting cars off the road, less pollution and no need for new roads. But locally</i>

<i>grown produce keep out paramours in business. Too much food is wasted here because it is too cheap and supermarkets are full of it.</i>
B Blame
<i>Been away for 1 month holiday, would normally do all of the above.</i>
<i>Born and bred here. Wouldn't like to live anywhere else.</i>
<i>Concentrate on it - there's not many places to go and relax in a good environment.</i>
<i>Councils have been strict about giving out green belt land for housing.</i>
<i>Don't think so, the local council seems to be doing a good job with the environment.</i>
<i>Durham is over-developed and has been ruined.</i>
<i>Got recycling more commercial than for the environment.</i>
<i>I am in favour of it, countryside should be converted to have more animals.</i>
<i>I can see the importance of the countryside - I grew up there. I don't visit or spend a lot of time there.</i>
<i>I did a head count on the people who were not using their cars. We should save and go green.</i>
<i>I have seen more vast improvements, proud to have been brought up in the North East. We have some treasures to be proud of.</i>
<i>I think that the area works hard to maintain itself</i>
<i>I wish people would do more to help the environment.</i>
<i>I would welcome more species of both.</i>
<i>I'm worried about this disease which has affected the chestnut trees in the Denes.</i>
<i>It has been considered in the bigger picture of sustainability, accounting also for societal and economic issues because ultimately we are a selfish species and tend not to act without considering the implications on our economy and society. For instance renewable energy, given the social and economic implications of oil and gas from unstable middle east countries, can be an economically variable and sustainable source. It has also been unfortunate to see from past experience that these you think are actually interested in bio-diversity e.g. RSPB Members are actually only interested in list ticking for particular species, and generally don't care about the habitat on the bigger picture, to the point where I have witnessed accounts of killing and poisoning other species.</i>
<i>It is a lovely place to live, I hope it doesn't change.</i>
<i>It is one of the most important issues, we should appreciate it more.</i>
<i>It is sickening to see the amount of development taking place alongside Durham riverside, it would be lovely to see more plants, grass and wildlife instead of ugly flats.</i>
<i>It's important for tourism.</i>
<i>It's important to keep it going for our future.</i>
<i>It's important to look after nature for the future.</i>
<i>It's lovely to see England's 'green' land</i>
<i>It's nice to know someone is interested in asking the public about their views.</i>
<i>It's not important to my life - I worry more about paying bills.</i>
<i>Its simple we are heavily polluted and we need more trees. Seeing trees is nice and tests have shown that there is less road rage when trees are on the roads. It has a calming influence.</i>
<i>I've been out of the area for some time and noticed the difference for the better, but more could be done. Regarding parks, some are not up to standard.</i>
<i>Lots of places to see for example Wallington and Gilside there is lots of wildlife.</i>
<i>More thought of the amount of development taking place in urban and rural areas. Too many flats and little natural green area .</i>
Mr D Buttes
<i>No nyths and fly life. If they all go, then that is the end of my fishing. Should make some sort of ban on what they put into the water. Stop the pollution in our rivers, such as detergent.</i>
<i>No, not really, except for all the new housing and out of town shopping is not good.</i>
<i>None apart from there is too much chuolding going on, especially in this area.</i>

<i>No-one is interested at university. No courses are offered in environmental studies.</i>
<i>Not really: the damage is already done.</i>
<i>Not too bad, the riverside, the park, Tunstall area.</i>
<i>Obviously climate changes, more of an natural occurrence rather than man. They use pollutions as an excuse to put taxes up.</i>
<i>Some of the stuff that the council does is stupid, like the bottle.</i>
<i>Sunderland needs more wildlife areas, near the town.</i>
<i>The council should stop selling green belt land for housing - they're putting greed first.</i>
<i>The county council were following an idea for a forest for the North East, and that would be a good move</i>
<i>The nature and historical issues of the area was important. Local authorities seem to undervalue these facts.</i>
<i>The place wouldn't be as nice if we didn't have animals and plants around.</i>
<i>The Tees is now cleaner then it has been for years, salmon is now on the increase because it is now cleaner and seals are coming up the river tees again.</i>
<i>There should be more places for people to go to see wildlife. More conservation areas.</i>
<i>Too many cars on the road and too many dogs running lose in the park.</i>
<i>Too many cars on the road, encourage more cycling and walking.</i>
<i>Too much building going in our city everywhere. Our river side has been ruined by Durham City Council, It's a mess.</i>
<i>Too much urban development in small villages. Inappropriate houses for the type of villages in the area. Too much land being developed and swallowed up, which is to important for wildlife, some of which can not tolerate urbanization.</i>
<i>We like the countryside and fresh air.</i>
<i>We live in a beautiful area which is spoilt only by industry but for the area, it is necessary to live.</i>
<i>We should be more interested in nature instead of money.</i>
<i>What is biodiversity, anyway?</i>
<i>Would love to but not enough time.</i>
<i>Yes we can never do enough to help the environment.</i>
